The choice of perfection

General information

First order

First orders have to be placed with us in written form. Exclusively specialist dealers are served by us.

Ordering by phone/fax/e-mail

The simpliest and safest way of ordering from R+M is sending your orders by fax or e-mail. Please be so kind as to immediately contact us if you have received problem reports.

Your orders are promptly processed after receipt. A confirmation of order is sent to you by return.

Subsequent incoming orders are entered as new ones and are separately processed. Unfortunately, we cannot agree with amending an order that has already been confirmed.

Phone: +49 (0) 2051-94857-0
Fax: +49 (0) 2051-94857-3400
E-mail: sales@rm-suttner.com

Orders can also be placed by phone during our business hours.

Business hours

Monday to Thursday	8 a.m. - 5 p.m.
On Fridays	8 a.m. - 3.45 p.m.

Address

R+M de Wit GmbH

Germany

Special requests

Products that are obtained specially for you or parts that are not included in our catalogue cannot be returned.

Internet

The very latest information about new products are provided on our web site **www.rm-suttner.com**. If you subscribe to our newsletter you are regularly and automatically informed about any news.

Catalogue

Please order the „neutral" catalogue for your customers! **R+M Nr.** 980 005 for 4.50 euro per piece.

Despatch

Despatch is effected by parcel service. Single products which are heavier than 30 kg as well as bulky goods are despatched by forwarding companies. These items are marked with the symbol . On request we can also despatch consignments by express carriage forward.

Delivery is effected ex works.

As smaller quantities cause extremely high costs please note our minimum order value of € 100,–. For goods of a net value under € 250,– packaging and carriage per shipment are as follows:

Category	1	1	2
Country	D	F/AT/B/NL/I/ CH*	DK/S/E/GB/LT/CZ/SF/PL/ N*
Shipment by UPS	€ 8,–	€ 10,–	€ 20,–
Shipment by forwarder	€ 30,–	€ 50,–	€ 70,–
* Customs clearance by forwarder	–	+ € 30,–	+ € 30,–
* Customs clearance by UPS	-	+ € 21,–	+ € 21,–
Different delivery address	+ € 5,–	+ € 5,–	+ € 5,–

Category 1: Charge per shipment of max. 3 parcels or 50 kg, the shipment is carried out by a forwarder in case of exceedance. Surcharge for bulky and long goods of more than 2.70 m: + € 20,–

Category 2: Charge per parcel up to 30 kg, the shipment is carried out by a forwarder in case of exceedance.

Surcharge for bulky and long goods of more than 2.70 m: + € 20,–.
Express deliveries and **all other countries**: at cost

Return consignments

As a matter of principle unused goods or goods that you complain about have to be returned carriage paid after having applied for. In this case, please ask for our application form for return consignments. Please note that consignments sent to us carriage forward are not accepted.

Additional deliveries

Due to our wide range of products it may happen that products are not obtainable for a short time. These products are then sent to you together with one of your next orders.

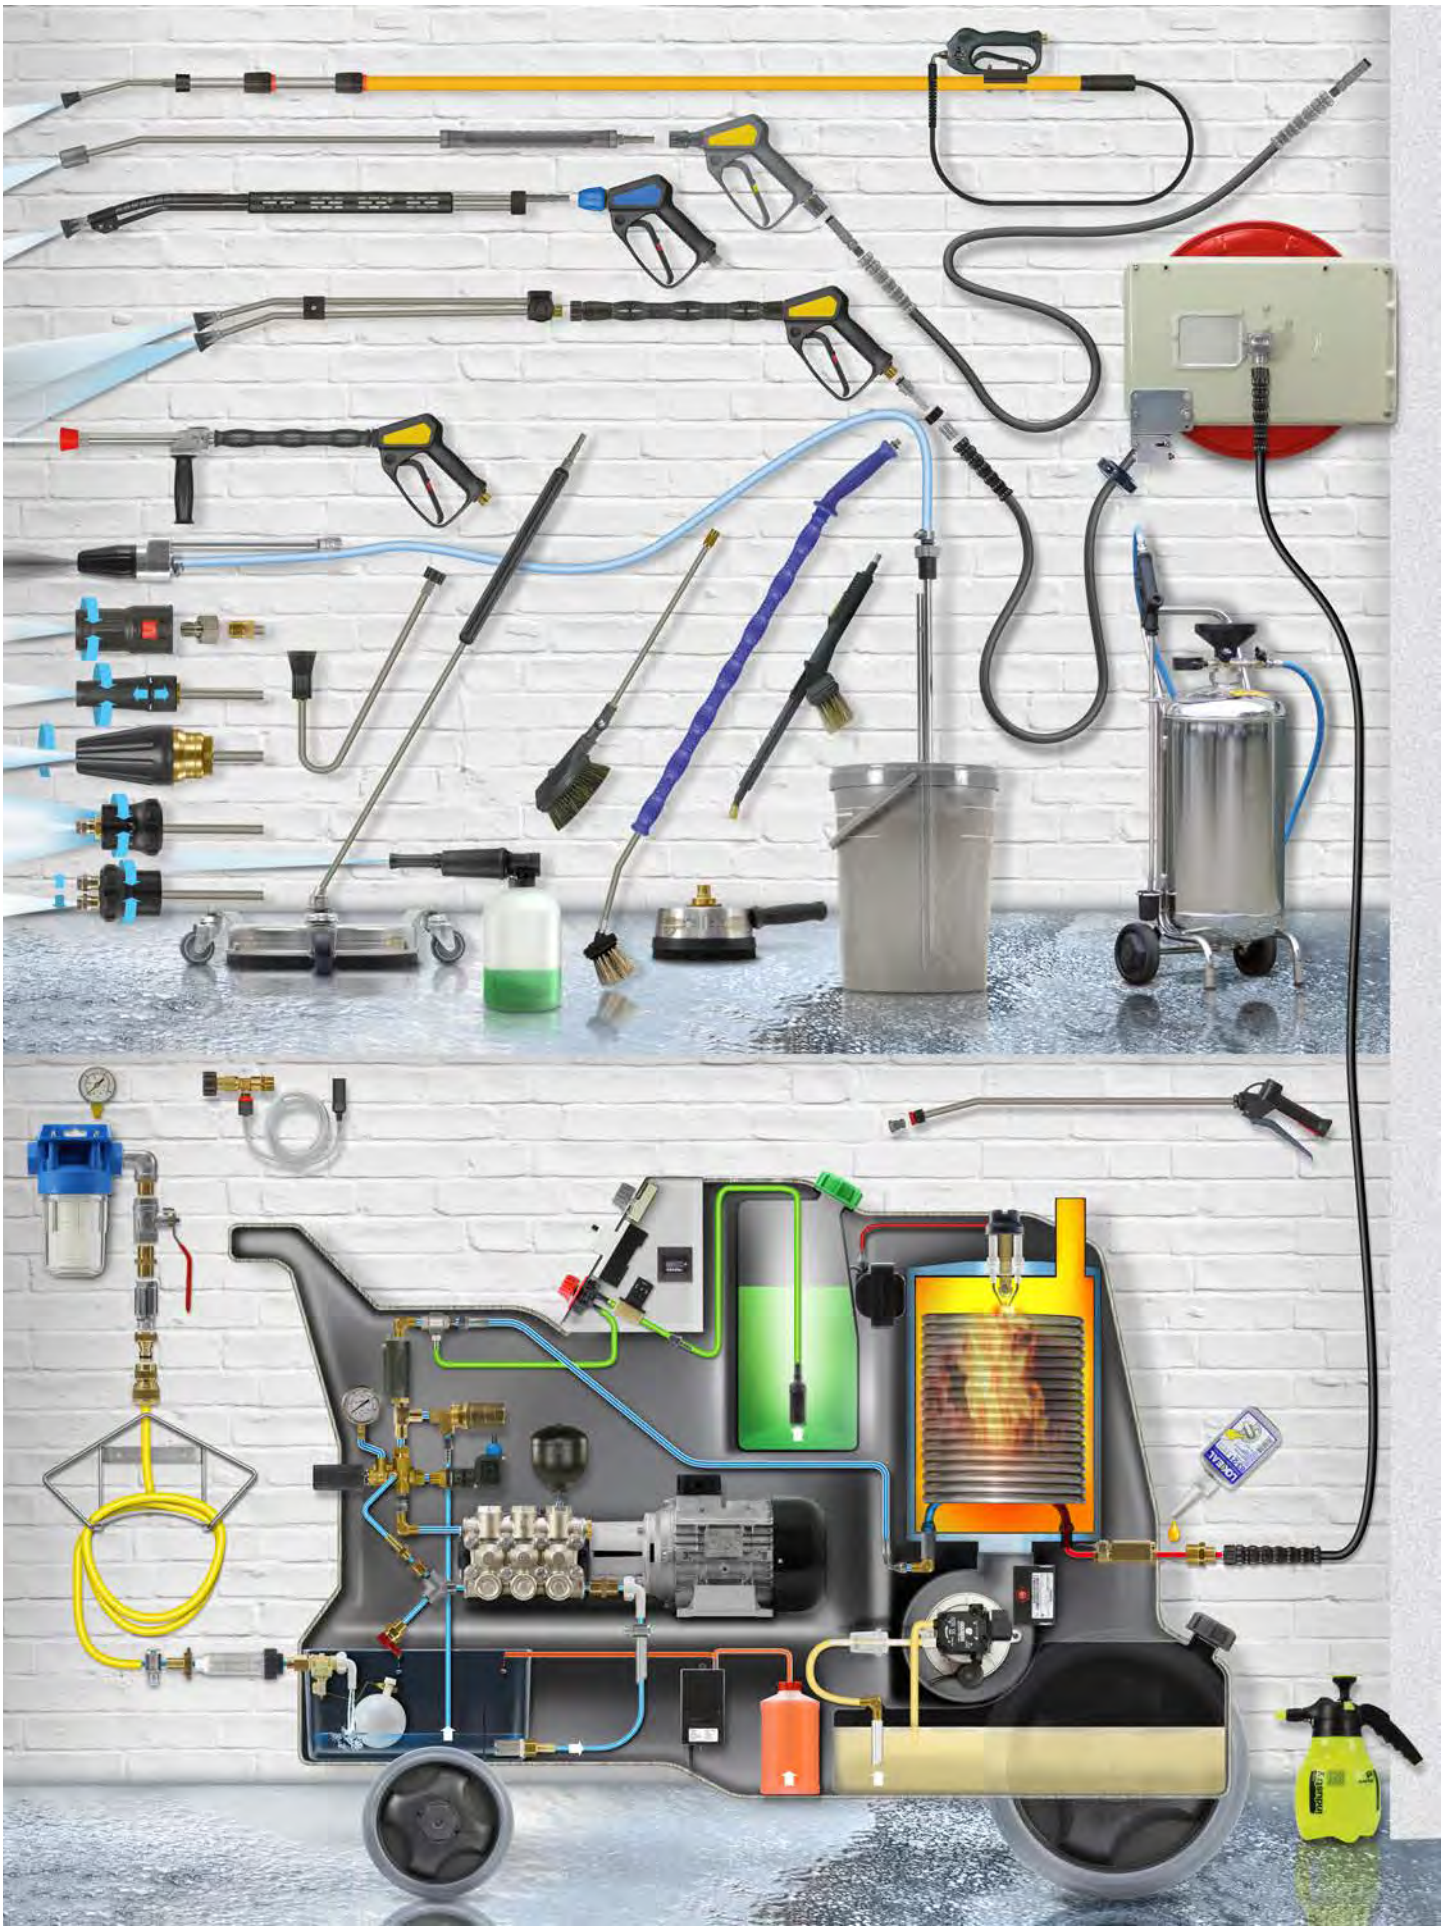

R+M high quality spare parts are obtained from well-established manufacturers. As a rule they are not original spare parts. The original order numbers and the indication of other information are exclusively for your guidance and furthermore they are not intended for the general use, e.g. invoices addressed to end users. In case of mentioning the original order numbers in your orders it cannot be assumed that the products ordered are original spare parts. Original spare parts are supplied when they are especially offered as those in our catalogue or in other mailing pieces such as special offers or newsletters.

R+M Nr.		
200 078 500	nozzle protector without nozzle	1/4" M

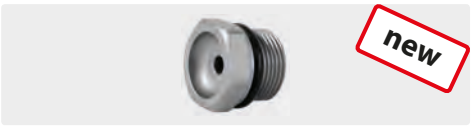

The longcast lance can be connected to a low pressure pump, to a high pressure pump, to the public water system or to the extinguishing water network.

The lance works in the medium pressure range. By means of its very good solidity, good handling and compactness the lance is especially suitable for the intensive use.

The lateral hand grip makes a stepless adjustment of the water jet during the operation possible. A long casting point jet or a progressive, conical spray jet can be set.

In order to realize ideal cleaning results the nozzle size needs to be adapted to the pump performance (pressure and water quantity).

Suttner steam guns

The steam guns of the series ST-4000 and ST-860D are the ideal solution for cleaning tasks with steam. Both series are designed for a medium temperature of up to 200 °C and for a working pressure of max. 20 bar. By means of a specifically produced valve housing with 3/4" F made out of aluminium the ST-4000 is suitable for extremely high flow rates. The ST-860D is unbeatable in case of small and medium flow rates.

Apart from being enormously resistant to high temperatures the sealing copolymer is suitable for all liquids based on mineral oil as well as for inorganic acids, alkaline solutions, alcohol and anti-corrosion liquids based on amines and seawater or on their mixtures.

The fact that the hose connection is positioned in the front of the gun positively effects the professional handling with the gun as well as the heat radiation close to hand and body.

Foodjet / foodjet 1500 - HP hose

Foodjet and foodjet 1500- High pressure hoses according to EN 854.
Particularly resistant to animal and **poultry fats**.

» Field of application: poultry processing industry.
» Suitable for oil, water, water-in-oil emulsions and water mixes with up to 50 % detergent.
» Surface synthetic rubber. Particularly abrasion-, oil-, ozone-resistant and weatherproof.
» Interior synthetic, oil-resistant rubber. Tight textile meshwork.
» -40 °C - +150 °C

Backflow preventers

Chrome-plated brass. Backflow preventer according to DIN 19884 and DIN EN 1717. Avoids that cleaning agents come into the potable drink circuit in case of excess pressure in the water pipe. Required when direct connection to pump

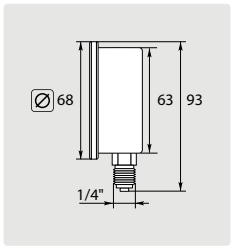

R+M Nr.	○	↕
734 10	3/4"	61 mm

According to the EU directives EN 60335-2-79:2010 currently in force, the water that passes through a high pressure cleaner is no longer considered fit for drinking. This is why such a cleaner cannot be connected directly to the drinking water supply network unless a back flow preventer disconnector has been fitted.

easywash365+ wash brushes - large areas are completely clean from now on!

By means of a very wide work surface of approx. 260 x 80 mm the **easy**wash365+ wash brush is especially designed for the efficient cleaning of large areas such as railway carriages, tramcars, omnibuses, caravans, trucks, boats and ships, facades, greenhouses as well as vehicles, motorcycles and many more.

Fine and extremely soft natural bristles with split ends ensure an especially gentle cleaning of sensitive surfaces such as windows and car finish. The solid body of the **easy**wash365+ wash brush consists of 152 bristle bundles which are attached undetachably by means of multi-component synthetic resin.

Our **easy**wash365+ wash brush convinces all users working in the self-service foam- and prewash of an ideal and very easy handling. The soft coating of the body made out of thermoplastic elastomer demonstrably protects sensitive surfaces from damages.

The inlet of the **easy**wash365+ wash brush is equipped with a brass insert with 1/4" female thread which is fixed in the body. By means of an additional grub screw the high pressure lances available at self-service bays are safe from twisting and theft. Therefore, the grub screw needs to be screwed to the lance tube. **Further fastening plates or protection against theft are not required.**

13 outlet ports at the bottom of the **easy**wash365+ wash brush enable the required water flow and guarantee a convincingly good foam quality at the same time.

Foam gun

Features

» Exceptional chemical resistance to acidic and caustic cleaner.
» Foam generating wand creates a thick clinging foam.
» Automatic dosing of chemicals.
» Durable polymer mixing head with stainless steel screws.
» Multi-ratio dial has 5 mixing settings and off.
» Anti-siphon built into handle.
» Gun is removable from quick coupling for clear rinsing with water.
» Easy filling by means of wide mouth.
» Only works with water pipe pressure.
» Suitable for all customary water couplings.

Applications

Designed for applications with acidic and caustic cleaner, soaps, disinfectants, degreasing and softening agents. The field of application is very versatile.

» Food industry and canteen kitchen
» Sanitary facilities and swimming baths
» Cleaning of trucks, cars and other vehicles
» Garages and petrol stations
» Shops and workshops

The foam gun directly connected to the public water pipe produces a cleaning foam by means of foam injector. The water pressure sucks in the cleaning agent and air, both are being mixed to consistent foam, sprayed out via the spraying head and the foam wand. The cleaning agent can also purposely and automatically be diluted via a built-in proportioner so that the right mixture of chemical and water as foam can be chosen for the cleaning application.

Technical specifications

Water pressure 2.5 - 6 bar (for maximum accuracy 3 - 4 bar)
Output 5.5 l/min

Mixing Ratio

Multi-ratio dial has 5 mixing settings and off

BERTOLINI high pressure pumps	58
CAT high pressure pumps	57
Chemical injectors	70
COMET high pressure pumps	56
COMET motor pumps	56
easyfoam365+ injectors by Suttner	71-73
Feet for pumps	54
Gears for pumps	47
Hawk high pressure pumps	58
High pressure check valves ST-264	67
High Pressure Filter ST-33	67
High pressure gauges glycerine filled	76
High pressure solenoid valves closed in off-position	76-77
INTERPUMP couplings and flanges	47
INTERPUMP high pressure pumps	43
INTERPUMP high pressure pumps for petrol engines	45
INTERPUMP high pressure pumps with built-in valve	44
INTERPUMP motor pumps	45
INTERPUMP regulation valves	65-66
INTERPUMP repair kits	46
INTERPUMP special high pressure pumps	44
Jetter Valves	54
Pressure switches	77
Pump accessories	58
Pump allocation according to flow rate	41
Pump allocation according to pressure	40
Pump unit with power take-off (p.t.o.) shaft gearbox	47
Pump/motor assignment	42
Reference list manufacturer number to R+M number	73
Regulation valves	62-64
Relief valves / pressure regulation valves	68
Repair kits for CAT high pressure pumps	57
Repair kits suitable for high pressure pumps	51
Repair kits suitable for Kärcher high pressure pumps	49-50
Repair kits suitable for KR	48
Repair kits suitable for Speck high pressure pumps	52
Repair kits suitable for WAP	48
Seal kits suitable for Lavor high pressure pumps	52
Single seals suitable for Kärcher	48
Suttner chemical injectors	69-70
Suttner chemical suction sets	70
Suttner flow switches	74-75
Suttner foam injectors	69
Suttner regulation valves	61
Suttner regulation valves ST-261	59-60
Thermal relief valves	67
Throttle control	66
UDOR high pressure pumps	46

R+M high quality spare parts are obtained from well-established manufacturers. As a rule they are no original spare parts. The original order numbers and the indication of other information are exclusively for your guidance and furthermore they are not intended for the general use, e.g. invoices addressed to end users. In case of mentioning the original order numbers in your orders it can not be assumed that the products ordered are original spare parts. Original spare parts are supplied when they are especially offered as those in our catalogue or in other mailing pieces such as special offers or newsletters.

Jetter Valves

Jetter valves are special valve assemblies which allow to shut off one particular intake valve. The Jetter Valve cuts off the flow of one of the three pistons of the jetter pump. Due to this the pump starts pulsating which causes significant vibrations of the nozzle and an increased cleaning effect at a reduced flow rate (approximatly -1/3 of the full flow rate of the pump). Jetter Valves should not be combined with pulsation dampers in one jetter unit. Jetter Valves substitute one of the three intake valves of a pressure pump (suction side (upstream)). Never use jetter valves as a substitute on the high pressure side! Pulsation can be started or stopped by a lever or hand wheel at the jetter valve.

R+M high quality spare parts are obtained from well-established manufacturers. As a rule they are no original spare parts. The original order numbers and the indication of other information are exclusively for your guidance and furthermore they are not intended for the general use, e.g. invoices addressed to end users. In case of mentioning the original order numbers in your orders it can not be assumed that the products ordered are original spare parts. Original spare parts are supplied when they are especially offered as those in our catalogue or in other mailing pieces such as special offers or newsletters.

Setting up of a regulation valve

www.rm-suttner.com

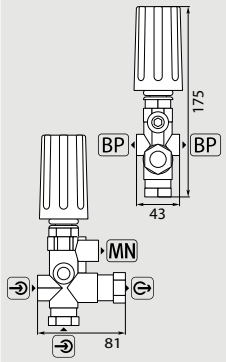

1. Loose fixing nut (A) and take off handgrip. Also loose nut (B) and nut (C). Put handgrip back in position without fixing it. Switch on high pressure device and press gun trigger.
2. While keeping an eye on the gauge`s pressure slowly tighten the handgrip. When working pressure is attained turn handgrip one rotation tighter. In this position nut (B) must be next to the handgrip. Otherwise, nut (B) has to be adjusted until this position is reached.
3. Take off handgrip and fix nut (C) against nut (B).
4. Unscrew the handgrip until it bumps to nut. Press trigger of gun several times in order to control the working and switching pressure. If necessary, repeat phase 2.
5. Turn handgrip back until minimum/steam pressure stage is obtained (according to indication of manufacturer). Mount fixing nut until swing of grip. Fixing nut (A) defines the stage of low and steam pressure, nut (B) defines the stage of working and switching pressure.

Setting up of a relief valve

Screw off fixing nut (B) and regulating nut (A). Switch on high pressure cleaner and press trigger of gun so that the entire water flow runs out of the relief valve.

Slowly unscrew regulating nut (A) until pressure on the gauge is higher than the working pressure of the machine i.e. (> 100 bar = 10 % . < 100 bar = 20 %). Switch off hp cleaner and unscrew fix nut (B) without changing the position of nut (A).

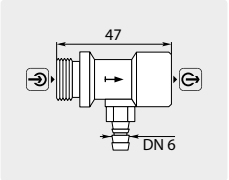

Attention

High pressure cleaner that are equipped with a regulation (bypass) valve must be set after having adjusted the relief valve.

Functional principle of a chemical injector

High pressure phase

Low pressure phase

The operation of the injector depends on:

1 The nozzle type must be chosen in dependence on the output of the high pressure cleaner.

2 The difference of pressure allows addition of chemical products occurred by special effect of "venturi" nozzle. This effect is given when the water also rinses through the low pressure nozzle. This has a bigger orifice than the high pressure nozzle and is mounted on the spray lance (e. g. at a double lance).

3 Length of the high pressure hose (should not be longer than 20 m).

4 Internal diameter of the high pressure hose (the longer the hose the bigger should be its internal diameter). Hose extensions injure output of the injector.

Suttner chemical injectors

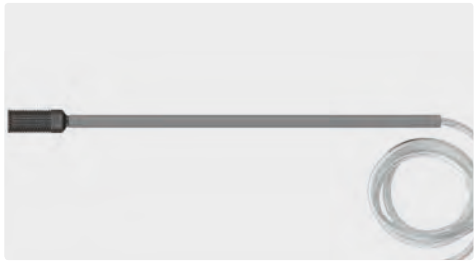

ST-64 upstream chemical injectors

Injector with shiftable and disengageable chemical dosing. For suction of chemicals in the water inlet of the pump. Mixtures of chemicals/water can be applied by high pressure. Please use the backflow preventer (R+M Nr. 734 10). Hose tail 6 mm. Max. 10 bar / 90 °C

ST-7 flow switches

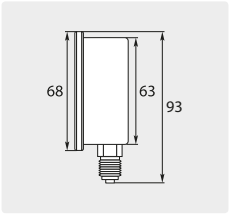

3/8" F. Protection class IP65. Cable 1,200 mm. 10 A. 250 V. Inrush current 20 A (NC) and 15 A (NO). Max. 350 bar / 45 l/min / 80 °C

R+M Nr.	⟵ switch-on points	
200 007 500	4.0 l/min	4.9 l closed. 3.5 l open
200 007 510	1.5 l/min	1.5 l closed. 0.8 l open

The ST-7 is a newly developed version of the flow switch having a completely new operating principle.
In this new development a robust and industrial micro switch is inserted instead of the usually supersensitive REED-contacts with low switching capacity.
This micro switch makes it possible to realize a significantly higher electrical output though having a longer working life.
The electrical and water-hydraulic components of the flow switch are completely separated.
The construction of the flow switch allows mounting the electrical parts independent of the hydraulic components within the series production process.
When fitting together chassis and switch box both parts of the flow switch are connected again.
Due to the mature engineering low switching points are realized in spite of maximum water quantities.
The pressure drop within the flow switch is only 1.5 bar at 30 l/min.

When exchanging the pressure switch please check the accumulator and if necessary exchange it.

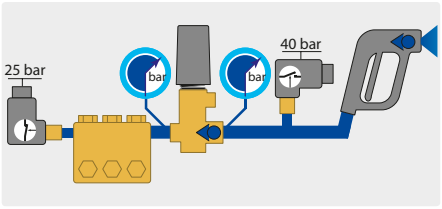

Example of use with two pressure switches

1 - Starting phase

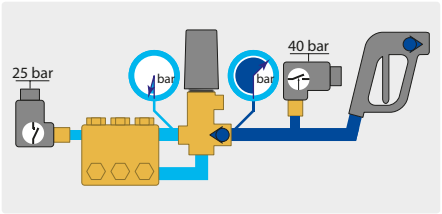

Contact of pressure switch (40 bar) is activated and by this way the cleaner can be started.

2 - High pressure phase

Reaching 25 bar the pressure switch (25 bar) changes the operating condition and secures the operation of the cleaner while pressure switch (40 bar) is deactivated.

3 - Stop phase

During the bypass phase water circulates in the pump without pressure.
The pressure switch (25 bar) opens and the cleaner stops. At the same time there is still high pressure between the regulation valve and the gun.
The high pressure cleaner starts again when operating the gun.

Adjustment of electrodes

from side | from top

1 Electrodes have to be positioned close to the atomized spray of fuel without getting in touch with it (ends have to stay dry).

2 There has to be sufficient space between the electrodes and the fuel nozzle as well as the flame control to avoid a flash over of the ignition spark.

* limited stock

Important

In case of using the series BHO 70 together with BHA 11/12 the new LDS has to be connected with the terminals 11 (blue) and 12 (black) of the BHA 11/12.

In case of replacing the series BHO 70 by BHO 64 which is already used with BHA 11/12 it is essential to choose the version of BHA 11/12 (1 October 2006) at which terminal 11 is added.

An alternative is to exchange the old Danfoss base part.

With effect from today - high pressure hoses with smooth cover in our range!

We are talking about an excellent high pressure hose with a very smooth surface having all positive features with the Flexy high pressure hose in common. The high pressure hose with smooth cover is characterized by the following features:

» a high grade of bending property by flexible structure and design

» is easily cleaned due to the smooth cover

» is easily pulled around any corner, does not get stuck!

» a low abrasion due to reduced friction

» particularly designed for the use on hose reels

The very clean, stain- and ozone-resistant, smooth surface can be easily cleaned and is branded with a durable printing which is vulcanized into the hose. By means of using a special rubber compound the hose`s flexibility was considerably improved.

CARWASH COMFORT - the new hose wonder in self-service washing bays

- High standard of easy and comfortable use in combination with spraying equipment, e.g. brush lance
- Light weight, 92 g/m at DN 6. More than half in weight in comparison to an usual self-service hose
- Chemically resistant, smooth interior made out of PES
- Transparent surface made out of a thermoplastic elastomer, depending on colour: CCBL, CCRT, CCGR, CCGE, CCGN
- Oil-, UV-, ozone-resistant and weatherproof
- Flexible in case of low temperatures: -40 °C – +60 °C, -40 °F – +140 °F
- High-tensile polyester reinforcing, working pressure of up to 200 bar with a fourfold guarantee that the hose does not burst
- Outer diameter 12 mm at DN 6
- Burst pressure > 800 bar

Further high pressure hoses suitable for self-service washing bays are available on request.

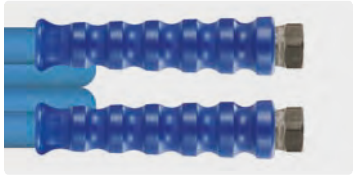

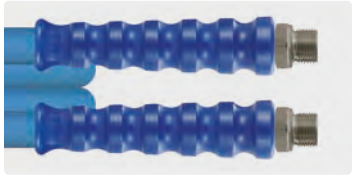

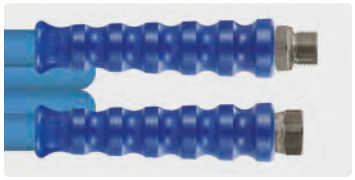

Foodjet - food hose with textile meshwork

Foodjet - high pressure hose according to DIN EN 854. Particularly resistant to animal and poultry fats

» Field of application: cleaning hose designed for the poultry processing industry
» Suitable for: oil, water, water-in-oil emulsion and water mixes with up to 50 % detergent
» Surface synthetic rubber. Particularly abrasion-, oil-, ozone-resistant, weatherproof
» Interior synthetic, oil-resistant rubber
» 3 tight textile meshwork
» Max. 80 bar. Burst pressure > 240 bar. -40 °C - +150 °C

Foodjet 1500 - food hose with textile meshwork

Foodjet 1500 - High pressure hose according to DIN EN 854. Particularly resistant to animal and poultry fats

» Field of application: cleaning hose designed for the poultry processing industry
» Suitable for: oil, water, water-in-oil emulsion and water mixes with up to 50 % detergent
» Surface synthetic rubber. Particularly abrasion-, oil-, ozone-resistant and weatherproof.
» Interior synthetic, oil-resistant rubber
» 1 tight textile meshwork
» Max. 125 bar. Burst pressure > 375 bar.
-40 °C - +150 °C

PUReClean365+® - food hose

PUReClean365+® - Food hose according to (EG) 1935/2004, (EU) 10/2011 and (EG) 2023/2006. Designed for industrial foam applications

» Field of application: foam hose and pre-spraying hose in the food industry. Suitable for contact with liquid food products

» Suitable for water and water mixes of usual cleaning detergents

» PVC hose with three layers and a smooth surface

» Increased 1-layer rot-proof textile mesh.

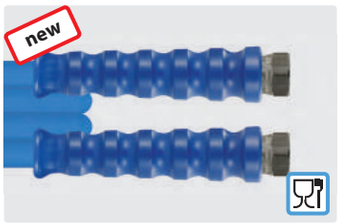

» **About 20 % lighter and more flexible than comparable hose types**

Galvanator - food hose

Interior synthetic rubber. Resistant to usual detergents. Very temperature-resistant. Double zinc-plated steel wire braid. Surface special synthetic rubber. **Resistant to poultry fats.** Non Marking (soot free). Field of application: poultry farms, slaughterhouses, fishing, bakeries etc. Not suitable for swimming baths, standard and industrial cleaning applications.

The advantages of the zinc-plated steel braids become obvious when effecting a salt water test. The Galvanator has been soaked in a 5 % salt water solution at 45 °C for 48 hours.

High pressure hoses for special applications

Superball

» High pressure cleaning hose with double steel wire braids for hot water
» Equipped with assembled protection balls which simplify the hose`s application
» Lower friction, easy to pull the hose around any corner, does not get stuck, free water flow under the hose is guaranteed, a very clean and hygienic cleaning hose
» Increased durability due to lower abrasive wear. Ideal for cleaning swimming baths
» -40 °C - +150 °C

powershield365+®

» Ideal for cleaning applications on rough floors which need to be cleaned by very non-abrasive hoses.
» Compact hose with corrosion-protected steel wire.
» Interior and surface synthetic rubber.
» Very abrasion-resistant UHMPE-coating
» Particularly abrasion-, oil-, ozone-resistant and weatherproof.
» Considerably increased durability compared to usual high pressure hoses.
» MSHA-permission
» -40 °C - +100 °C

High pressure hoses for special applications

greyflex – high pressure hose

» Ideal field of application: food and beverage industry, fish farming and swimming pools
» Plug, crimp and connection stainless steel
» Excellent ease of use, extremely light weight and flexible in case of low temperatures
» Smooth and stain-resistant surface made out of thermoplastic elastomer
» Ideal for the use on rough floors due to high abrasion resistance
» Grease, oil-, UV-, ozone-resistant and weatherproof
» Brass-plated wire braid
» Suitable for working pressures of max. 275 bar. DN 10.
-40 °C - +120 °C, -40 °F - +248 °F

Superball

Interior synthetic rubber. Double steel wire braid for hot water. Surface synthetic rubber. Equipped with moulded and assembled protection balls which simplify the hose`s application. Lower friction, easy to pull the hose around any corner, does not get stuck, free water flow under the hose is guaranteed, a very clean and hygienic cleaning hose. Increased durability due to lower abrasive wear.
Field of application: Ideal for cleaning swimming baths. Roll at 25 m

R+M Nr.	TYP	DN	⌀	P	BP	℃

Hose bend restrictor in wave design - showing your company logo!

We offer you the possibility to combine your personal spray guns ST-2300 and ST-2600 with your individual hose bend restrictor, this is possible from 525 pieces. You are invited to choose your favourite colour of your hose bend restrictor and to think about what you would like to have written on it or which logo you would like to see on it. It is really up to you as you can give free rein to your creativity! The lettering on the two fields is solely determined by you. By means of labelling your personal hose bend restrictor you succeed in enhancing the product itself and also in making your company and brand better known.

The hose bend restrictor very bendable and also flexible at low temperature is equipped with a lip that engages behind the crimp cartridge and avoids any loosening. It is characterized by a very smooth surface structure, oil and abrasion resistance.

The black and yellow versions are recommended to be used for outdoor applications. The blue and grey hose bend restrictor is especially designed for being used inside as for example in the food industry. It is generally phthalate-free, resistant to chemicals as well as chlorine- and grease resistant in all colours.

The P16 HP hose press is an innovative, high quality machine which is especially designed for the assembly and repair of hose lines. The handling of the press is easily learnt. Fundamental features of the P16 HP:

» access to press head on both sides
» compact model
» two-stage hand pump
» variable adjustment of press measures
» check of press measures by signal light
» carrying handle
» integrated drawer in the housing for storing the pressing jaws

Spare pressing jaws

Heat exchangers in thermal power stations or conveyor pipes in the food industry are often sewers of 10 to 12 mm in diameter. In order to clean them effectively from the inside a device for sewer cleaning with small diameters and high pressures is required.

We have also in this case the best possible solution for you!

"small" as desired and "powerful" with great performance.

We are talking about the new mini-device for sewer cleaning. Being only 9 mm in diameter the nozzle withstands the working pressure of up to 500 bar. Completely sensational or what do you think? The nozzle for sewer cleaning is made out of stainless steel and equipped with three jet outlets to the back and one forward.

The mini-nozzle for sewer cleaning is supplied with a black plastic hose with a nominal diameter of 2 and assembled with 1/8" M. The device is so suitable for all common high pressure cleaner.

Sewer cleaning hose assemblies

sewerclean365+ **PU-sewer cleaning hose**

» cut- and abrasion-resistant
» extremely long operating life
» highly tearproof by two-fold braid of aramid fibres and polyurethane surface
» good swimming features
» ageing resistant and weather-resistant surface
» -40 °C - +60 °C, -40 °F - +140 °F

DKR : M

1/2" : 1/2"

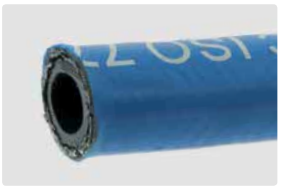

All hoses are supplied together with a test certificate according to EN 10204.3.1.1.

ST-71 hose reel with sewer cleaning hose

The ST-71 hose reel is equipped with a 15 m Flexy sewer cleaning hose DN 6. The frame of the reel is made out of stainless steel and the reel is made out of plastic.

The space-saving and orderly solution can either be hung up at the wall or refitted in high pressure cleaner.

The hose can be used as extension of high pressure hoses or as sewer cleaning hose.

Suttner mini rotating nozzles for sewer cleaning ST-49.3

1/8“ F. Nozzle with thrust. ⌀ 12 mm.
Ideal for cleaning or flushing out pipes as well as adjoining lateral pipes at any angle. Small pump capacities required, only.
2 rotating radial jets (90°) to the pipe wall for best cleaning results.
2 rotating rear jets (45°) for forward thrust and flushing away of the waste material.
Suitable for pipes from 14 - 50 mm.
Hardened stainless steel.
Max. 500 bar

Applications:
» Cleaning of deposits
» Cleaning of grease, fat and organic deposits
» To clean heat exchangers

R+M Nr.	D
200 049 950	05
200 049 970	07

Mini-nozzles for sewer cleaning

Heat exchangers in thermal power stations or conveyor pipes in the food industry are often sewers of 10 to 12 mm in diameter. In order to clean them effectively from the inside a device for sewer cleaning with small diameters and high pressures is required.

Being only 9.8 mm in diameter the nozzle withstands the working pressure of up to 500 bar.
Together with our R+M 1 / Bronze hose (30420) the complete sewer cleaning unit will be rated up to 300 bar and 100° C

Milling Type Nozzles ST-49

With its 3 to 4 very strong concentrated forward jets and the sharp cutting edges the milling type nozzles will tear through almost any kind of blo-ckage. The sharp edges cut, break and penetrate through every kind of blockage. Made out of wear-resistant, hardened stainless steel.
All nozzles are equipped with replaceable hardened stainless steel rear and centric front jets. Due to this feature the efficiency is considerably higher compared to those nozzles with drilled holes and the service life is several times longer.
Max. 300 / 350 bar

Applications:
» Penetration of completely clogged pipes
» Opening of root masses
» Opening of frozen pipelines
» Hydraulic thrust boring flushing operations

Suitable for all 1/4" F nozzles for sewer cleaning.

Small plough jet nozzle

For 2 fan jets 1/4" M NPT

Fitted with two rear facing fan jets the small plough jet nozzle is great for desilting drains and sewers. The heavy forged brass construction keeps the jet firmly planted in the base of the pipe where the silt deposits collect and blasts them back towards the manhole.
Width approx. 72 mm. Weight 1.5 kg.
Max. 420 bar / 150° C / 80 l/min.
1/4"-nozzles need to be assembled under 45° to achieve best cleaning results. Select nozzle size according to pressure and flow rate of the machine.

R+M Nr.		
010 000 399	1/2" F	2 x 1/4" F NPT

For 2 ST-357 rotating nozzles

Fitted with two rear facing ST-357 rotating nozzles the small plough jet nozzle is the ideal solution for desilting drains and sewers.
The heavy forged brass construction keeps the jet firmly planted in the base of the pipe where the silt deposits collect and blasts them back towards the manhole.
Width approx. 88 mm. Weight 2.5 kg.
Max. 350 bar / 90° C / 80 l/min.
Select rotor nozzle size symmetric according to pressure and flow rate of the machine.

R+M Nr.

Our rotating nozzles are on page 269.

Rotating nozzle adaptor

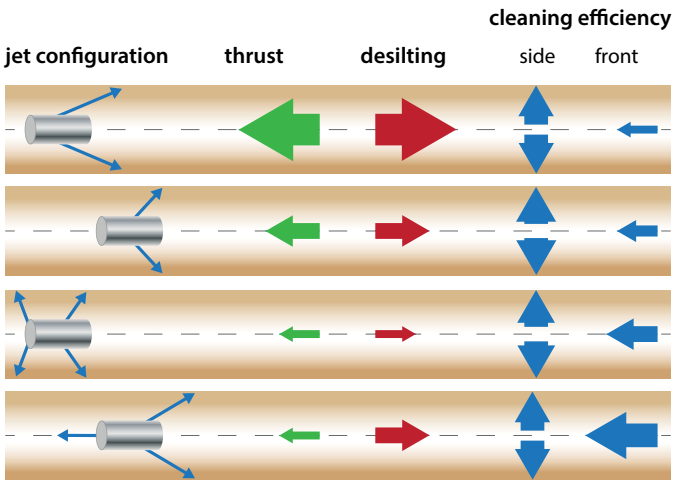

Designed for connecting the ST-357 rotating nozzle to a sewer cleaning hose. Hardened stainless steel body with extra sharp edges.
Max. 400 bar

For ST-357 rotating nozzle

R+M Nr.		
200 049 400	1/4" F	1/4" M

Possible jet configurations

Jetter Valves

Jetter valves are special valve assemblies which allow to shut off one particular intake valve.
The jetter valve cuts off the flow of one of the three pistons of the jetter pump. Due to this the pump starts pulsating which causes significant vibrations at the nozzle and an increased cleaning effect at a reduced flow rate (approx. -1/3 of the full flow rate of the pump).
Jetter valves create vibrations to help the hose sliding around tight bends in small lines.
Jetter valves should not be combined with pulsation dampers in one jetter unit.
Pulsation can be started or stopped by a lever or hand wheel at the jetter valve.

Functional principle

Driver for rotating nozzles

Rotor nozzle driver and rotor nozzles are the perfect combination for drilling through blockages with its rotary forward facing jet. Driven up to the blockage by 6 powerful rear facing hardened stainless steel nozzles the high speed forward facing spinning jet creates a cone shape that has enough cutting force to blast through roots and scale. It is also ideal for cutting up and shredding tissue and fat deposits

For ST-357/ST-456 rotating nozzles. Hardenened stainless steel. Max. 350 bar. 1/4" M and 6 M5 threads for nozzle inserts (see table below).

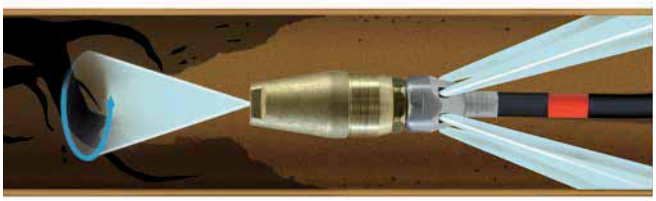

R+M Nr.	
040 075 200	1/4" F
040 075 205	3/8" F

For ST-458/ST-559 rotating nozzles. Hardenened stainless steel. Max. 500 bar. 1/4" M and 6 M5 threads for nozzle inserts (see table below).

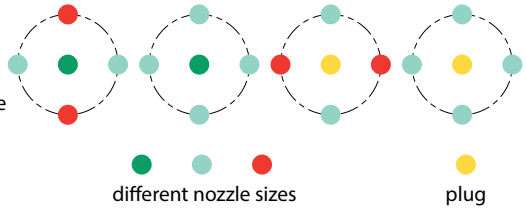

R+M Nr.	
040 075 210	3/8" F
040 075 215	1/2" F

Functional principle

Nozzle configuration

Nozzle inserts for sewer cleaning nozzles and nozzle driver have to be installed **symmetrically.**

Nozzle Inserts

Full jet. 500 bar.
Hex for allen key 2.5 mm.

Egg-type Radial-Nozzles

Best performing and most durable design for higher efficiency.
These are light and agile used as a great all around nozzle with replaceable inserts. They include a forward jet.
The egg-type radial nozzle is wear resistant and cost competitive. Great for sanitary applications. With unrivaled cleaning power on heavy encrusted grease and sludge, hardened stainless steel body and replaceable nozzle inserts for longer life.

The ideal tool for the toughest applications of hard grease and scale that may be encrusted on the interior wall of the pipe.
Material: Hardened stainless steel.
Max. 500 bar / 150 °C

Suttner steam guns

The steam guns of the series ST-4000 and ST-860D are the ideal solution for cleaning tasks with steam. Both series are designed for a medium temperature of up to 200 °C and for a working pressure of max. 20 bar. By means of a specifically produced valve housing with 3/4" F made out of aluminium the ST-4000 is suitable for extremely high flow rates. The ST-860D is unbeatable in case of small and medium flow rates.

Apart from being enormously resistant to high temperatures the sealing copolymer is suitable for all liquids based on mineral oil as well as for inorganic acids, alkaline solutions, alcohol and anti-corrosion liquids based on amines and seawater or on their mixtures.

The fact that the hose connection is positioned in the front of the gun positively effects the professional handling with the gun as well as the heat radiation close to hand and body.

ST-860D steam gun

Professional steam gun ST-860D.

R+M Nr.		
200 078 500	nozzle protector without nozzle	1/4" M

The longcast lance can be connected to a low pressure pump, to a high pressure pump, to the public water system or to the extinguishing water network.

The lance works in the medium pressure range. By means of its very good solidity, good handling and compactness the lance is especially suitable for the intensive use.

The lateral hand grip makes a stepless adjustment of the water jet during the operation possible. A long casting point jet or a progressive, conical spray jet can be set.

In order to realize ideal cleaning results the nozzle size needs to be adapted to the pump performance (pressure and water quantity).

easywash365+ spray guns by Suttner

Freeze stop valves in **easy**wash365+ spray guns and freeze stop spray guns

Except for the valve screw the valves are completely made out of stainless steel. Contrary to all common freeze stop valves the real body is a hardened stainless steel ball. This difference significantly increases the robustness, reliability as well as preciseness in switching.

What is the difference between the versions freeze stop and weep?

Half-shell kits: Makeover of your gun

With effect from today, we enlarge the range of colours for our gun family ST-2300, ST-2600, and ST-2700. You can choose from green, blue, red, and yellow!

By means of our half-shell kits, it is possible to adapt the guns individually to your company's colour or to the one of your customers. By using different colours, the affiliation to a certain unit (e.g. rental business), user, or application is possible in an easy way, too.

Moreover, the guns can be used for allocation to different areas within the scope of the HACCP directive. In this respect, we offer further interesting products in different colours for lance clips, nozzle protectors, and plugs for rotating nozzles in Chapter 13, HACCP. This product range now features coloured insulated handles for lances with a length of 900 mm.

What would you like to mark in your colour? Select your appropriate half-shell kit, here!

If you like to have your corporate logo on the logo plate, please follow the instructions given on the following page: "Design your own Suttner gun".

Kit contains half shells, logo plate, trigger and trigger lock

Create your individual Suttner spray gun

If you are honest with yourselves, will you not appreciate seeing your company`s logo on your Suttner spray gun? Or do you prefer having the telephone number of your favourite restaurant or the web site of your football team on your spray gun? It's up to you. We will certainly let your dream come true.

In the following passage we show you how that works. These seven steps have to be made:

Step 1 choose your model: ST-2300 or ST-2600

Step 2 determine your desired version

Step 3 state your favourite colour

Step 4 fill in the file with the label and return it to R+M. Please provide us your logo in one of the most common kinds of file (BMP, FES, GIF) and inform us about the typeface and typesize which you have used

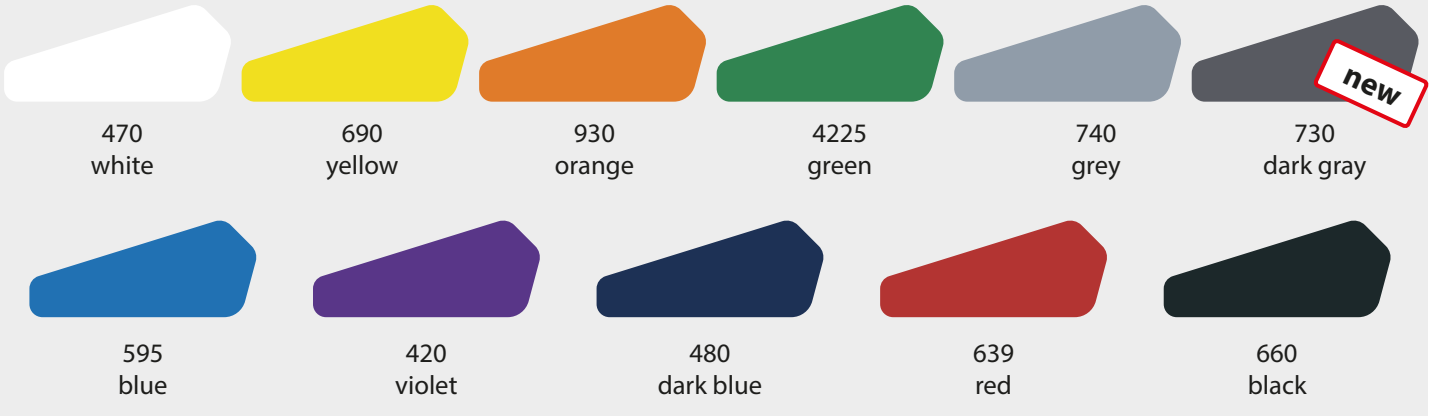

Step 5 release the processed logo in writing

Step 6 arrange for a one-time transfer of € 300.00 for the production of the tools needed for the label

Step 7 place an order with us for 250 labels and one packing unit of spray guns (35 or 50 guns) without label

Create your individual Suttner vented handle

R+M Nr.	↔	℃
200 009 051	380 mm	max. 150 °C

With effect from today we offer you the possibility to combine your personal spray guns ST-2300 and ST-2600 with your individual vented handle ST-9. It is suitable for all 1/4" lances and if required, a grip can be mounted on the side at any time. Furthermore, the vented handle can be pushed over the outlet of all Suttner spray guns so that both products form an aesthetic whole. In case of hot water applications the user is steadily protected.

Try to determine your favourite colour of your personal label and already start thinking about what you would like to have written on it or which emblem you would like to see on it. It is really up to you as you can give free rein to your creativity. We will certainly let your dream come true. By means of labelling your personal ST-9 you succeed in enhancing the product itself and also in making your company and brand better known.

Get to your personal vented handle ST-9 in only 5 steps!

Step 1 determine your favourite colour

Step 2 fill in the file with the label and return it to R+M. Please provide us your logo in one of the most common kinds of files (BMP, FES, GIF) and inform us about the typeface and type size which you have used

Step 3 release the processed label in writing

Step 4 arrange for a one-time transfer of € 300.00 for the production of the tools needed for the label

Step 5 place an order with us for 240 labels and 1 packing unit of vented handles (80 pieces, R+M Nr. 200 009 051) without label

Lances with ergonomic swivel screw coupling

» Lances suitable for Kärcher spray guns.
» The lance has an ergonomic and conical swivel screw coupling operating as a connection piece between the lance and the spray gun. The new design off ers a smooth transition from the spray gun to the lance.
» Rotating by 360° under pressure.
» All materials are rust-free and of premium quality.
» The hand screw coupling is made out of shock-resistant plastics and equipped with a brazen thread. The internal nipple of the hand screw coupling is made out of stainless steel.
» Nozzle protector without tip.

ST-175 Foam & Clean

The change-over lance ST-175 Foam & Clean is the ideal accessory for Suttner's foam injector line. The innovative change-over technology allows to direct the full flow into either one or the other outlet pipe just by turning the hand wheel at the inlet.

In one position of the hand wheel the flow is directed thru an ST-75 foam head for foaming. After changing over the full flow is directed thru the other pipe and a regular spray nozzle for rinsing.

Appropriate nozzle sizing at chemical injector and ST-175 allows changing from foaming to rinsing right at the lance. ST -175 Foam & Clean is compatible to ST-160 / ST-164 / ST-166 / ST-167.

Due to ST -175's changeable air injector nozzles the lance can be driven with all pressure washers with flow rates from 5 to 25 l / min.
Nozzles with integrated jet former are required (page 316).

Twin foam lance with vented handle ST-9 380 mm, change-over valve ST-58, nozzle protector ST-10 without nozzle and foam head ST-75 without nozzle. A foam injector is required.
Max. 350 bar / 45 l/min / 100 °C

R+M Nr.		
200 078 500	nozzle protector without nozzle	1/4" M

The longcast lance can be connected to a low pressure pump, to a high pressure pump, to the public water system or to the extinguishing water network.

The lance works in the medium pressure range. By means of its very good solidity, good handling and compactness the lance is especially suitable for the intensive use.

The lateral hand grip makes a stepless adjustment of the water jet during the operation possible. A long casting point jet or a progressive, conical spray jet can be set.

In order to realize ideal cleaning results the nozzle size needs to be adapted to the pump performance (pressure and water quantity).

Advantages of Power-MEG nozzle

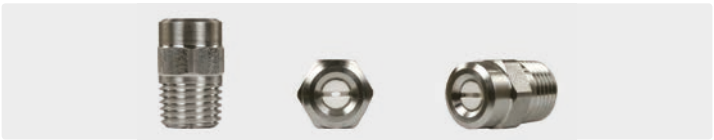

3 times faster

saves up to 60 % water

3 times higher impact

Ceramic high pressure nozzles

» Ceramic inserts provide up to 10 times the life of stainless steel inserts, maximizing your return of investment and decreasing downtime for nozzle replacement.
» Extra long life ceramic orifice is nearly diamond-hard to resist wear.
» The used ceramic is specially designed for high pressure and elevated temperature.
» The extremely hard ceramic insert guarantees a more precise and stronger
» Wedge-shaped orifice insert seats tightly as spray pressure increases.
» The external body made out of stainless steel V2A / AISI 304 has a polished surface which is resistant to rust and slight damages.
» The nozzles are equipped with a 1/4" M NPT connection.

Choosing the suitable nozzle is most important for output and smooth function of the high pressure cleaner:

Nozzle too small = machine permanently switches into bypass or off.
Nozzle too wide = machine has a small output, lower pressure.

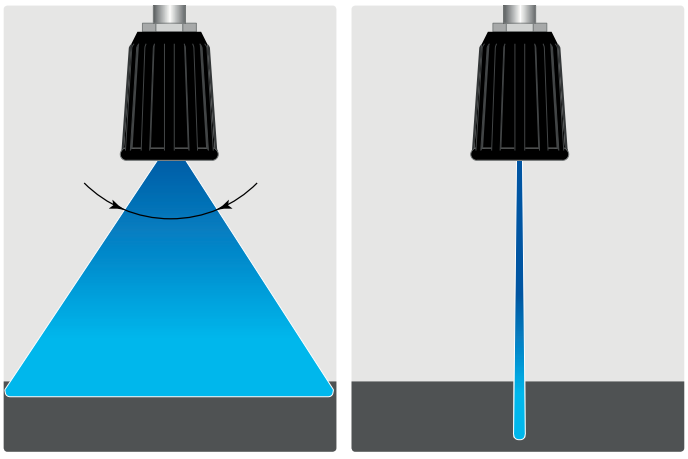

How to choose the suitable nozzle?
Attention: pressure and flow of the high pressure cleaner must be known e.g. 15 l/min (900 l/h) - working pressure of 150 bar.

1. In the first line (pressure in bar) please go to column "150".
2. Follow column "150" down to find l/min: take "15.2" (nearest to 15).
3. Turn left in line "15.2" until the first column and stop at nozzle type "055".
4. The size you need is "055"
5. On pages 264 -265 please select type of nozzle and spray angle.
6. In line "055" please find the R+M Nr. of the nozzle you need.

Important for excellent high pressure cleaning is the impact of the spray jet which is made up of 4 features.

water flow | water pressure | spray angle | spray distance

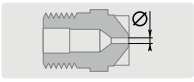

low impact = high surface efficiency

high impact = small surface efficiency

* hole diameter in mm

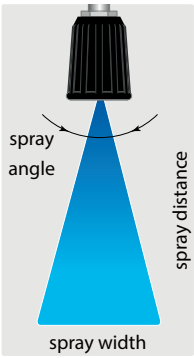

Further information about high pressure nozzles

Output in l/min depends on pressure in bar

Nozzle protector and nozzle holder

2-component nozzle protector ST-10

The ST-10 is the ideal combination made out of hard and soft plastics. The nozzle protector is suitable for cold and hot water applications in the car wash, agriculture and food industry. The ST-10 is unimpeachable, protects your nozzles and preserves the surfaces to be cleaned at the same time. Suitable for nozzles 1/4" M NPT. Zinc-plated steel max. 400 bar. Stainless steel max. 500 bar

hydroblade® Nozzle System

new

Set consists of nozzle holder, 6 equal nozzles and O-rings.
Max. 400 bar / 150 °C

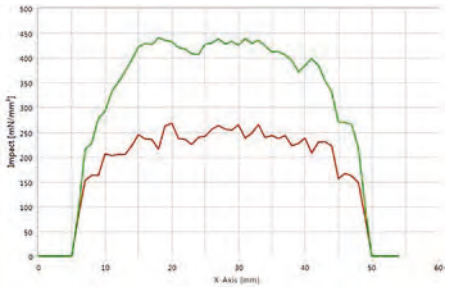

» Strong and uniform flat jet with extraordinarily narrow jet depth
» Application: High pressure and steam jet cleaning
» Suitable for existing systems
» Stainless steel

hydroblade® Benchmark

hydroblade® flat jet nozzles feature a homogenous liquid and pressure distribution.
Highly efficient jets are achieved with spray angles of up to 40°. Thanks to the flow geometry of the nozzles, a compact and controlled jet is generated.

The **hydro**blade® set consists of nozzle holder, 6 equal nozzles, and corresponding O-rings.

Suttner rotating nozzles in different colours

With effect from today we enlarge the choice of colours of the plastic plugs for our rotating nozzles ST-357, ST-456 and ST-458. In addition to the standard colour black, you are invited to take the nozzle in blue, red, yellow and green, now. The decision is up to you as it is possible now to adapt the rotating nozzles individually to your company`s colour or to the one of your customers.

By using different colours the affiliation to a certain unit (rental business), user or application is possible in an easy way. Moreover, classifications regarding different areal divisions within the HACCP can be realized.

What would you like to mark? Please find it out and test it!

Lance clips

The lance clips are easily clamped onto every 1/4" lance thus informing the user about the nozzle size or the affiliation to a certain unit, user or application.

Moreover, classifications regarding different areal divisions within the HACCP can be realized. The marking of various spray angles is also possible.

The lance clips suitable for all 1/4" lances are made out of polypropylene which is intended to come into contact with foodstuffs.

Quick connect spray nozzles by Spraying Systems

limited stock

- Original Spraying Systems nozzles exclusively for R+M / Suttner
- High strength plastic. Highly impact resistant.
- Long lifetime and excellently thermal and chemical stability. Resistant to mineral acids and alkaline solutions.
- Nipple stainless steel. Nipple at black nozzle plastic.
- Suitable for applications requiring a frequent and quick change of the spraying angle.
- Max. 210 bar

Blasting nozzle. Delivers a very concentrated stream of water. **Care should be used to avoid gouging wood or damaging fragile surfaces.**

Chiseling nozzle. The spray should be directed at a 45° angle to the surface and used like a scraper to remove paint, grease and dirt.

Flushing nozzle. Best suited for flushing dirt, mud and grime.

Wash nozzle. Recommended for rinsing and moderate washing.

Low pressure soap nozzle. Designed for prespraying detergents on all kinds of surfaces. Low pressure rinsing.

easywash365+ wash brushes - large areas are completely clean from now on!

By means of a very wide work surface of approx. 260 x 80 mm the easywash365+ wash brush is especially designed for the efficient cleaning of large areas such as railway carriages, tramcars, omnibuses, caravans, trucks, boats and ships, facades, greenhouses as well as vehicles, motorcycles and many more.

Fine and extremely soft natural bristles with split ends ensure an especially gentle cleaning of sensitive surfaces such as windows and car finish. The solid body of the **easy**wash365+ wash brush consists of 152 bristle bundles which are attached undetachably by means of multi-component synthetic resin.

Our **easy**wash365+ wash brush convinces all users working in the self-service foam- and prewash of an ideal and very easy handling.

The soft coating of the body made out of thermoplastic elastomer demonstrably protects sensitive surfaces from damages.

The inlet of the **easy**wash365+ wash brush is equipped with a brass insert with 1/4" female thread which is fixed in the body. By means of an additional grub screw the high pressure lances available at self-service bays are safe from twisting and theft. Therefore, the grub screw needs to be screwed to the lance tube. **Further fastening plates or protection against theft are not required.**

13 outlet ports at the bottom of the **easy**wash365+ wash brush enable the required water flow and guarantee a convincingly good foam quality at the same time.

One tool, six blasting agents, numerous applications:

The sandblaster is suitable for dust-free blasting of the following solids with a grain size ranging from 0.4 to 1.2 mm:

- **Glass beads**
  for cleaning of copper and bronze as well as polishing of stainless steel
- **Glass powder**
  for cleaning of stainless steel and natural stone or for removal of graffiti from light surfaces
- **Slag (fine)**
  for cleaning of sandstone or brick as well as removal of graffiti from dark surfaces
- **Slag (coarse)**
  removal of rust from metals or of old coatings and paintings. cleaning and grinding of concrete surfaces
- **Sodium carbonate (water-soluble)**
  cleaning of sensitive surfaces such as aluminium, glass, plastics, stainless steel
- **Mineral blasting agent (sand)**
  removal of rust from metals or of old coatings and paintings. Cleaning and grinding of concrete surfaces. Varnish removal.

Mosmatic surface cleaner with air recovery system and integrated gum remover

» Such as the other devices of the FL-AH series the new FL-AH-KAU is a record performance regarding quality, finish and excellent cleaning result. We do not know anybody who has not yet seen places such as railway stations, stadiums, schools and many more which are covered with hundreds of chewing gums. This development is the best solution against this appearance!

» In order to ensure an effective removal of the gums the special nozzle is positioned behind the stainless steel cap. The surface is cleaned in a conventional way by means of the gun which is mounted at the right side. In case of removing stubborn dirt e.g. chewing gums the special nozzle is switched on by the gun mounted at the left side. The gums are cut up and totally removed by the hp jets and finally sucked in.

» By means of four 100 mm plastic rolls the surface cleaner can be easily moved.

» The frame as well as all mounting parts made out of stainless steel offer additional stability. Best cleaning results are achieved due to the height adjustable housing.

» The swivel has reinforced self-lubricating stainless steel ball bearings and a dual spring based carbide seal system especially designed for higher revs. This combination guarantees a very long durability.

» 2 spray guns ST-2605 equipped with the patented LTF technology, 2 hp nozzles 15° 03 and a special nozzle for the removal of chewing gums are included. Further nozzle sizes are available on request.

» Suitable for 50 mm suction hose. Suction hose is excluded.

» Max. 350 bar / 120 °C. Min. 15 l/min / 250 bar

R+M Nr.	⌀	G	
108 809 61	520 mm	3/8" F	20 kg

LTF - Low Trigger Force 90 % reduced holding force and 40 % reduced trigger force against usual market guns.

Mosmatic surface cleaner with recovery system for steam generator

The surface cleaner FL-DAR is the newest innovation from Mosmatic. It is possible to clean walls and other surfaces with steam and keep them dry. Save time! Steam cleaning is a great way to disinfect, sterilize or degrease surfaces. By using this cleaner you are able to clean 4-5 times quicker than by using a lance. The FL-DAR can be used with steam up to 180 °C and a ø 200 mm hand held model or a ø 300 mm floor model with wand are available. Both cleaner are equipped with nozzles. The complete stainless steel construction makes them perfect for the medical and food industry. Best performance with 10 kW steam generator.
Delivery: 2 - 3 weeks

FL-DAR 200

PA castors
The castors allow free movement in any direction while having the same distance from the nozzles to the surface. The castorsare made out of PA thus being suitable for the food industry.

Splash protection
The plastic rim guard prevents over spray and flying debris. It is extremely effective due to the wavy design.

Foodjet - food hose with textile meshwork

Foodjet - high pressure hose according to DIN EN 854. Particularly resistant to animal and poultry fats

» Field of application: cleaning hose designed for the poultry processing industry
» Suitable for: oil, water, water-in-oil emulsion and water mixes with up to 50 % detergent
» Surface synthetic rubber. Particularly abrasion-, oil-, ozone-resistant, weatherproof
» Interior synthetic, oil-resistant rubber
» 1 tight textile meshwork
» Max. 80 bar. Burst pressure > 240 bar. -40 °C - +150 °C

Foam head ST-75

By means of the foam head ST-75 different foam applications are possible as the air injector nozzle is easily exchangeable and adaptable. The flat spray nozzle can be infinitely adapted from the vertical position to the horizontal one. The maximum flow is dependent on the chosen nozzle size. By means of the integrated air injector in the foam head the air is sucked in on the face side. Independent of the length of the lance a constant foam quality is guaranteed. The spraying result is especially even as a high quality foam nozzle insert is used.

ST-175 Foam & Clean

The change-over lance ST-175 Foam & Clean is the ideal accessory for Suttner's foam injector line. The innovative change-over technology allows to direct the full flow into either one or the other outlet pipe just by turning the hand wheel at the inlet.

In one position of the hand wheel the flow is directed thru an
ST-75 foam head for foaming. After changing over the full flow is directed thru the other pipe and a regular spray nozzle for rinsing.

Appropriate nozzle sizing at chemical injector and ST-175 allows changing from foaming to rinsing right at the lance. ST -175 Foam & Clean is compatible to ST-160 / ST-164 / ST-166 / ST-167.

Due to ST -175's changeable air injector nozzles the lance can be driven with all pressure washers with flow rates from 5 to 25 l /min. Nozzles with integrated jet former are required (page 316).

Twin foam lance with vented handle ST-9 380 mm, change-over valve ST-58, nozzle protector ST-10 without nozzle and foam head ST-75 without nozzle. A foam injector is required.

easywash365+ foam sets

By introducing the universally applicable **easy**wash365+ foam sets we succeeded in enlarging the application possibility of our foam injector family.

The stainless steel injector with high pressure foam lance which is installed via a T-piece between the outlet of the high pressure unit and the original spraying unit is especially designed for the professional cleaning of trucks of shipping or food companies as well as for applications in the industrial foam cleaning.

The connection from injector unit to the high pressure foam lance is realized by an optionally high pressure hose of up to a length of 40 m. The already existing spraying unit is used for cleaning and rinsing works. Enormous savings of both cleaning agent and time can be achieved as the foam lance has cleaning agent immediately available without switching at the unit or change of equipment.

It is possible to simplify the handling of the construction and to boost efficiency at the same time by integrating two hose reels. This set is suitable for all common high pressure cleaning units for up to 310 bar and max. 90 °C.

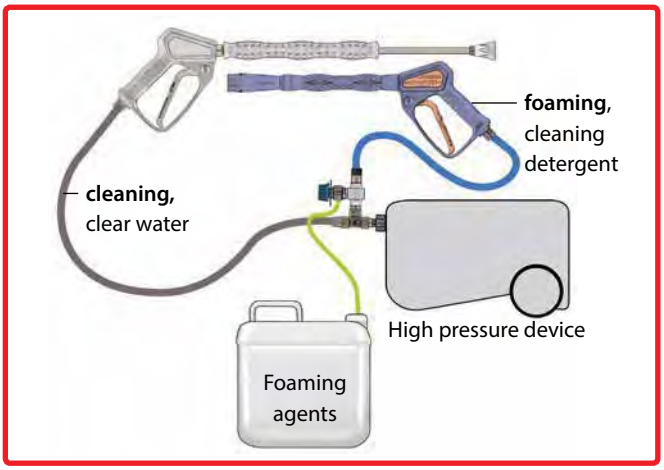

easywash365+ foam set: **easy**wash365+ foam lance standard with foam head ST-75, injector ST-160 (M22 F and 2 x M22 M) with metering valve ST-161, suction hose 1000 mm and suction filter ST-32. Max. 310 bar / 90 °C

- Ergonomic handling by means of the well-tried **easy**wash365+ spray gun with LTF-technology
- Available in 2 length: 900 and 1,200 mm
- Brush with injector is also available as retrofit kit
- **easy**wash365+ spray gun is obtainable as standard, weep or freeze stop version
- Lance swivel ST-345 is optionally available
- Not suitable for powder chemicals

TÜV NORD CERT GmbH – Made in Germany – Product test acc. to TN-Standard AFE-0018

R+M high quality spare parts are obtained from well-established manufacturers. As a rule they are not original spare parts. The original order numbers and the indication of other information are exclusively for your guidance and furthermore they are not intended for the general use (e.g. invoices addressed to end users). In case of mentioning the original order numbers in your orders it can not be assumed that the products ordered are original spare parts. Original spare parts are supplied when they are especially offered as those in our catalogue or in other mailing pieces such as special offers or newsletters.

easyfoam365+ foam injector ST-160.2

In order to produce foam with the ST-160.2 a foam lance without air intake is absolutely required. The air quantity needed for foaming is supplied by an additional connection positioned at the injector. The use of a spray gun with large cross section areas such as for example ST-2720, ST-2725, ST-3100 or ST-3300 with suitable lances and foam hoses (blufood) is recommended.

The injector is especially designed for low and medium pressure applications from a water inlet pressure of 5 bar and it generates an excellent foam when being provided with the required quantity of compressed air.

Injector chemically resistant stainless steel 1.4305 / AISI 304. Injector with metering valve ST-161, compressed air connection and wall bracket. Inlet / outlet 1/2" F.
Max. 350 bar / 90 °C

easyfoam365+ foam injector ST-160.3

ST-160.3 – injector for large water quantities and high dosages

The stainless steel injector features three pairs of injector and nozzle in one housing which can be configured independently. This enables numerous metering and foam applications.

Since each pair of nozzles has its own chemical inlet, different chemicals can also be mixed in different ratios.

In the low-pressure range, flow rates of up to 20 l/min can be realised. This is why, the injector is suitable for quick and easy filling of scrubber dryer while up to 5 l/min of cleaning agent can be added.

In the high-pressure range, water quantities of more than 100 l/min can be realised without any problems. For example, fixed or mobile foam arches, such as required for cleaning the inside of tunnels, can be operated with a large number of foam nozzles.

In order to produce large foam quantities in the low-pressure range, the injector is provided with an compressed air connection.

Injector chemically resistant stainless steel 1.4305 / AISI 304. Injector with compressed air connection and wall bracket. Inlet / outlet 1/2" F.
Max. 350 bar / 90 °C

easyfoam365+ bypass injectors ST-167 without compressed air module

easyfoam365+ product line has been enlarged

The injectors completely made out of stainless steel make it possible to open two cross section areas (50 mm² each) in order to guarantee a smooth use without drop in pressure when washing/rinsing. This ensures that the injector can be permanently kept in the high pressure line, also at the time when large water quantities are used e.g. in the agriculture or food industry. The cleaning capacity when cleaning and rinsing is not affected at all. A lever makes it possible to change from the cleaning and rinsing mode into injector operation. When using the cleaning mode, there are two bore holes guiding the high pressure water parallel to the injector (bypass mode). When using the injector the available water quantity is guided through the injection area.

In combination with a foam lance (ST-72, ST-74 oder ST-75), an adjustable or a triple nozzle the **easy**foam365+ injector ST-167 can suck in chemicals by means of the integrated check valve made out of stainless steel. It depends on the chosen nozzle whether the chemical can also be sprayed on or foamed. The foaming covers large areas and a long exposure time is guaranteed. One further advantage of the foam cleaning is that already covered surfaces are easily seen.

The **easy**foam365+ injector which is available in the nozzle size of 1.2 - 2.8 mm meets the requirements in every field of application in the professional cleaning industry. The dosing is adjusted by one of the 10 nozzle inserts which are included in the consignment. As an alternative there are also versions with the infinitely variable dosing unit ST-161 available.

The connection for chemicals equipped with an integrated check valve and an intake for the nozzle inserts has a hose tail for chemical suction hoses being 9 mm in diameter in order to suck in especially viscous fluids. The direction of flow is marked with arrows to guarantee a smooth installation.

easyfoam365+ **bypass injectors ST-167**

easyfoam365+ bypass injectors ST-168 with compressed air module

easyfoam365+ product line has been enlarged

The injectors completely made out of stainless steel make it possible to open two cross section areas (50 mm² each) in order to guarantee a smooth use without drop in pressure when washing/rinsing. This ensures that the injector can be permanently kept in the high pressure line, also at the time when large water quantities are used e.g. in the agriculture or food industry. The cleaning capacity when cleaning and rinsing is not affected at all. A lever makes it possible to change from the cleaning and rinsing mode into injector operation. When using the cleaning mode, there are two bore holes guiding the high pressure water parallel to the injector (bypass mode). When using the injector the available water quantity is guided through the injection area.

In order to produce foam a foam lance without air intake is absolutely required. The air quantity needed for foaming is supplied by an additional connection positioned at the injector. The use of a spray gun with large cross section areas such as for example ST-2720, ST-2725, ST-3100 or ST-3300 with suitable lances and foam hoses (blufood) is recommended. The injector ST-168 is especially designed for low and medium pressure applications from a water inlet pressure of 5 bar and it generates an excellent foam when being provided with the required quantity of compressed air.

The **easy**foam365+ injector which is available in the nozzle size of 1.2 - 2.8 mm meets the requirements in every field of application in the professional cleaning industry. The dosing is adjusted by one of the 10 nozzle inserts which are included in the consignment. As an alternative there are also versions with the infinitely variable dosing unit ST-161 available.

The connection for chemicals equipped with an integrated check valve and an intake for the nozzle inserts has a hose connector for chemical suction hoses being 9 mm in diameter in order to suck in especially viscous fluids. The direction of flow is marked with arrows to guarantee a smooth installation.

Assembly scheme easyfoam365+ bypass injectors ST-168 with compressed air module

Bypass injector ST-168 with hose tail 9 mm and compressed air module (hose tail 9 mm).

Bypass injector ST-168 with metering valve ST-161 & compressed air module (hose tail 9 mm).

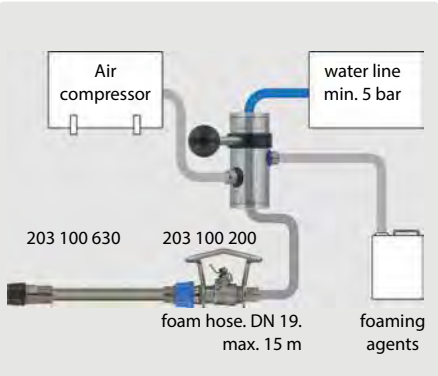

Have you already known? ...that our bypass injector ST-168 can also be operated with water line pressure.

The compressed air-driven **easy**foam365+ bypass injectors of the series ST-168 are designed for foam applications with medium pressure units (10 to 50 bar) in the field of the food industry.
The **easy**foam365+ bypass injector ST-168 is a real alternative especially for smaller companies such as farmers or fish breeding companies which are selling the goods ex farmyard. These smaller companies have to stick to the existing hygiene standards such as larger firms, but they are reasonably shy at the great investment volume for a medium pressure unit.

By means of only water line pressure - 5 bar flow pressure - and the appropriate accessories for the spraying unit - hose with big nominal width, ball valve 203 100 200 and suitable foam lance 203 100 630 an excellent foam quality is reached.
When switching the lever from the injector operation into cleaning and rinsing mode the addition of cleaning agent and disinfectant is stopped and the fully available water quantity passes the bypass injector nearly without any drop in pressure.

easyfoam365+ foam and disinfectant units ST-164

Field of application: Designed for the cleaning of vehicles carrying cattle, food, frozen foods and fish in order to avoid bacterial spread. Also suitable for cleaning milking parlours and applicable in cattle bredding, piggery, poultry farming and in the pisciculture.

The foam device is a combination made out of stainless steel and special high performance plastics. The addition of one out of two connected chemicals is determined by positioning the lever.
All versions are suitable for the addition in low pressure from approx. 5 bar up to max. 350 bar.
When being operated in rinsing function up to 60 l/min pass through the unit without any drop in pressure.

In combination with a foam lance (ST-72, ST-74 or ST-75), an adjustable or a triple nozzle the ST-164 injector can suck in chemicals by means of the integrated check valve made out of stainless steel and spray them on or foam them depending on the chosen nozzle.

The injector has an optional compressed air connection in order to supply the required air quantity for foaming already in the injector unit.
For the application of foam a foam lance without air intake is absolutely required. The use of a spray gun with large cross section areas such as for example ST-2720, ST-2725, ST-3100 or ST-3300 with suitable lances and foam hoses (blufood) is recommended.

The injector is especially designed for low and medium pressure applications from a water inlet pressure of 5 bar and it generates an excellent foam when being provided with the required quantity of compressed air.

The ST-164 injector is available in the nozzle size of 1.2 - 2.8 mm.
The dosing is adjusted by one of the 10 nozzle inserts which are included in the consignment. The connection for chemicals is equipped with an integrated check valve.

Injectors without compressed air module

Foam gun

Applications

Designed for applications with acidic and caustic cleaner, soaps, disinfectants, degreasing and softening agents. The field of application is very versatile.

» Food industry and canteen kitchen
» Sanitary facilities and swimming baths
» Cleaning of trucks, cars and other vehicles
» Garages and petrol stations
» Shops and workshops

The foam gun directly connected to the public water pipe produces a cleaning foam by means of foam injector. The water pressure sucks in the cleaning agent and air, both are being mixed to consistent foam, sprayed out via the spraying head and the foam wand. The cleaning agent can also purposely and automatically be diluted via a built-in proportioner so that the right mixture of chemical and water as foam can be chosen for the cleaning application.

Technical specifications

Water pressure 2.5 - 6 bar (for maximum accuracy 3 - 4 bar)
Output 5.5 l/min

Features

» Exceptional chemical resistance to acidic and caustic cleaner.
» Foam generating wand creates a thick clinging foam.
» Automatic dosing of chemicals.
» Durable polymer mixing head with stainless steel screws.
» Multi-ratio dial has 5 mixing settings and off.
» Anti-siphon built into handle.
» Gun is removable from quick coupling for clear rinsing with water.
» Easy filling by means of wide mouth.
» Only works with water pipe pressure.
» Suitable for all customary water couplings.

HACCP – Colour Coding Concept

new

R+M/Suttner's hygienic colour-coding concept

Suttner's color-coded concept provides a pragmatic approach to the food sector's challenges of ensuring efficient hygienic cleaning and a visibly safe physical environment in:

» Food and beverage manufacturing facilities and throughout their supply chain
» Professional kitchens and restaurants
» Food-related areas of supermarkets and shops

Durable and effective accessories

All of R+M/Suttner's food-industry specific 'high hygiene' tools are made of 1935/2004/EC compliant materials and materials which meet the requirements of EC regulation 10/2011/EC regarding food contact materials and can be washed at high temperatures to eliminate germs and bacteria. All equipment is durable, fully molded to guarantee easy cleaning, and capable of maintaining a long-lasting attractive appearance. The effective tool range includes spray and foam guns, spray lances, nozzle protectors, foam lances and hoses in up to four color-code options.

Safety spectacles, safety goggles and face shields

Safety spectacles

» Anti-fog, scratch-proof and antistatic polycarbonate lens
» Integrated side protection. Including neck cord
» 100 % UV-protection
» Protected against shock, splinters and solid particle
» Weight 25 g

R+M Nr.
956 002 817

Flip-up face shields

» Anti-fog, scratch-proof and antistatic polycarbonate lens
» Adjustable headgear
» 100 % UV-protection
» Protected against shock, splinters, solid particle and chemical danger (dangerous drops)
» Weight 200 g

R+M Nr.
956 003 487

The accident prevention regulations of the Employer's Liability Insurance Association regarding "the use of high pressure cleaner" (BGV D15) and "tasks with liquid jets" (BGV D26) prescribe that adequate eye and face protection have to be worn in case of an operating pressure of 25 bar and more.

Safety goggles with temples

» Anti-fog, scratch-proof and antistatic polycarbonate lens
» Straight temples with adjustable strap. Integrated side protection. Exchangeable plastic foam rim with indirect ventilation
» Including microfibre cloth
» 100 % UV-protection
» Shockproof in case of extreme temperatures
» Protected against shock, splinters, solid particle and liquids
» Weight 52 g

R+M Nr.
956 004 828

Safety goggles with adjustable strap

» Anti-fog, scratch-proof and antistatic polycarbonate lens
» Fits over prescription spectacles. Ball-pivot. Fits with respiratory half mask
» 100 % UV-protection
» Shockproof in case of extreme temperatures. Resistant to chemical drops, toxic gases, small and big toxic particle, melting metals and hot solids
» Weight 113 g

R+M Nr.
956 003 067

Visor

» Anti-fog, scratch-proof and antistatic polycarbonate lens
» Visor in connection with safety goggle 956 003 067
» Shockproof in case of extreme temperatures. Resistant to chemical drops, toxic gases, small and big toxic particle, melting metals and hot solids
» Weight 73 g

R+M Nr.
956 003 128

easyprotect365+ protection for high pressure cleaning

easyprotect365+ **professional protective clothing for abrasive blasting operations up to 500 bar / 7,500 psi.**

The strongest fiber in the world for the toughest demands of the world. Thanks Dyneema any application grown to safely master the most difficult tasks.

The perfect protection for people who work professionally with high-pressure cleaner not only in the industry.

Comfort, function and safety

Until now there has been no adequate protection for high pressure cleaning.

Nothing that corresponded to the achievements of modern devices or user requirements on comfort and functionality. Our experience with water blasting work at high pressures (up to 500 bar / 7,500 psi) and other personal protective equipment are the basis for our new clothing range. **easy**protect365+ protection for high pressure cleaning.

Ideal protection for abrasive blasting of concrete rehabilitation works, shipyards, petrochemical and steel industry.

Overall with hood

» 3-layer overall with CE certification
» Security for blasting work up to 500 bar
» Adjustable cuffs, ventilation under the arms
» Lined for maximum wearing comfort
» Waterproof and breathable
» Weight 2.5 kg. Sizes XS - 3XL
» Protection class 5/5/2

easyprotect365+ protection for high pressure cleaning

Apron

- 3-layer apron with CE certification
- Security for blasting work up to 500 bar
- Ideal for work in warm environments
- Adjustable carrying band, waist band
- Easy to put on and waterproof
- Weight 0.7 kg
- One Size
- Protection class 5/5/2

R+M Nr.
956 123 501

Special gloves

- Special gloves with CE certification
- Security for blasting work up to 500 bar
- Sand-rubber coating for maximum grip
- Extra inner glove made of nylon
- Protection class 5 cut 4 abrasion, tear and cut resistance
- In two sizes 8 / 11
- Protection class 5/5/2

Automatic hose reels

The ST and SoST series are robust and reliable hose reel models with automatic spring return with the following characteristics:

» Maintenance-free slide bearings made out of plastics being resistant to chemicals, wetness and dirt.

» There are 8 positions per rotation to stop the hose. A quick pull unmakes the locking device.

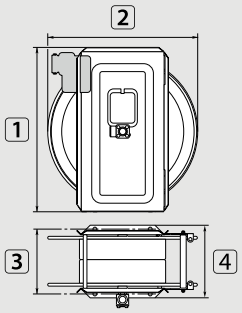

» The hose reels are all equipped with a swivel ST-322. The swivels ST-322 are completely made out of stainless steel and have a ring as sealing element.

» Suitable for the mediums water or water with cleaning detergent, air, oils and greases.

» Further models are available on request: electrostatically buffed suitable for the food industry or the ATEX version designed for applications in explosion-proof areas.

Inox automatic hose reels

» Base frame stain. steel V2A / AISI 304. Reel made out of especially impact-resistant ABS plastic which is usually used for the manufacture of motorcycle helmets and in the automotive industry.

» Due to the high quality construction of the automatic spring-driven high pressure hose reels they are suitable for applications in service stations, garages, in the agriculture and in the building industry etc.

» The automatic hose reels are easy to install in every place such as wall, ceiling, vehicle etc. An optionally available wall bracket enables an easy mounting of the hose reel.

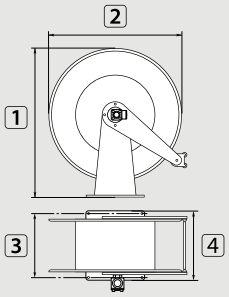

» All models offer a traction release. A quick pull unmakes the locking device.

» The hose reels are all equipped with a swivel ST-322. The swivels ST-322 are completely made out of stainless steel and have a ring as sealing element.

» Due to the processed materials the hose reels are unhesitatingly suitable for the mediums water, water with cleaning detergent, oils, greases and air.

» They are suitable for a working pressure of max. 300 bar and a temperature of max. 90 °C.

Automatic hose reels

Due to the high quality construction of the automatic spring-driven high pressure hose reels they are suitable for applications in service stations, garages, in the agriculture and in the building industry etc.

» The automatic hose reels are easy to install in every place such as wall, ceiling, vehicle etc. An optionally available wall bracket enables an easy mounting of the hose reel.

» All models offer a traction release. A quick pull unmakes the locking device.

» The hose reels are all equipped with a swivel ST-322. The swivels ST-322 are completely made out of stainless steel and have a ring as sealing element.

» Due to the processed materials the hose reels are unhesitatingly suitable for the mediums water, water with cleaning detergent, oils, greases and air.

» Fixed as well as swivelling brackets are available for all models. Both brackets and hose reels are made out of stainless steel V2A / AISI 304.

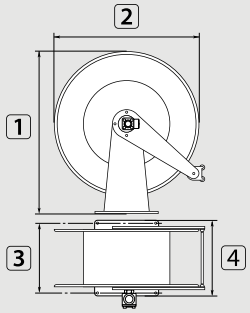

» According to directive 94/9/EG (Atex 95/100) the hose reels are suitable for applications in mining and explosion-proof areas.

» They can be used in explosive zones 1 + 2 (gas) and 21 + 22 (dust). The temperature has to be defined accordingly.

R+M service

In case of an order for hose reels and hose please be informed that we are willingly prepared to directly mount the assembled hose on your desired hose reel.
For this purpose you only have to state the **R+M Nr.** 740 00 on your order.
It's definitely worth booking this service!
Should you require more information about our offer, do not hesitate to contact us at any time!
We are looking forward to receiving your order.

High pressure hose reels

STKI

The STKI series suitable for applications in craft and industry:

» The base frame is made out of canted steel sheet profiles which stand for excellent stability.

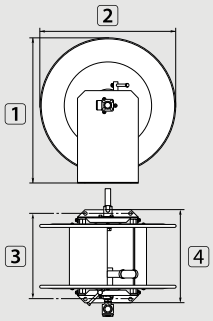

» The drum rotates by means of an adjustable handwheel being equipped with a free-wheel polyamide grip.

» By means of a mechanical brake integrated in the bearing the drum can be slowly decelerated or even totally blocked.

» Suitable for the mediums water or water with cleaning detergent, air, oils and greases.

» The hose reels are all equipped with a swivel ST-322. The swivels ST-322 are completely made out of stainless steel and have a slide ring as sealing element.

High pressure hose reels

STK

Series STK made out of deep-drawing metal sheet:

» Fold-away handwheel

» Adjustable braking and blocking device.

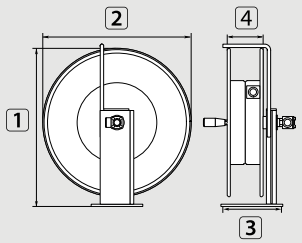

» Steel shackle avoids rolling over of the hose.

» Maintenance-free synthetic bearing sleeves.

» The hose reels are all equipped with a swivel ST-322. The swivel ST-322 are completely made out of stainless steel and have a slide ring as sealing element.

» Suitable for the mediums water or water with cleaning detergent, air, oils and greases.

ST-71

» The base frame is made out of stainless steel V2A / AISI 304 and stands for highest stability.

» Equipped with an especially wide orifice of 12 mm.

» Suitable media: water or water with cleaning chemicals, air, oils and grease.

» The drum hub consists of 5 sturdy stainless steel rods and runs in specially maintenance-free bearing sleeves.

» The drum rotates by means of an adjustable handwheel being equipped with a free-wheel polyamide grip.

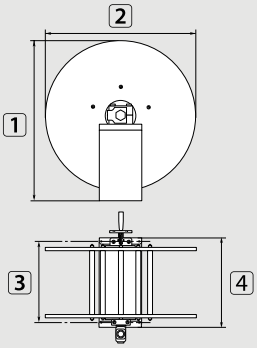

» A mechanical brake makes it possible to lock in 6 positions.

» This high pressure hose reel is equipped with the swivel ST-322.

» The Suttner swivels ST-322 are completely made out of stainless steel and have a slide-ring sealing element.

» Not suitable for being mounted at walls and ceiling.

easywash365+ spray guns by Suttner

New freeze stop valves in **easy**wash365+ spray guns and freeze stop spray guns
Except for the valve screw the new valves are completely made out of stainless steel. Contrary to all common freeze stop valves the real body is a hardened stainless steel ball. This difference significantly increases the robustness, reliability as well as preciseness in switching.

What is the difference between the versions freeze stop and weep?

The picture illustrates the different effects regarding diverse winter safety methods of high pressure spray devices. The physical effect that liquids in motion tend to freeze to a lesser extent forms the basis of both versions. Therefore, both the weep as well as the freeze stop version let water pass through the valve (in case of different pressures and under the circumstances) even if the spray gun is closed in order to keep the water which is in piping, hose and spray device in motion.

The weep high pressure spray guns let a reduced water quantity pass through even if the trigger of the gun is not pulled as there is a notch in the seal seat of the valve. This is ensured in high pressure when the high pressure pump is in operation as well as in low pressure in case of water pipe pressure.

The so called freeze stop spray guns are equipped with a valve in valve technology. The operating valve which is driven by the spray gun trigger includes the real automatically operating freeze stop piston. For cleaning applications the spray gun is opened and closed as usual by the operating valve. The integrated freeze stop valve only comes into operation when there is low pressure (water pipe pressure). It is opened in a spring driven way if the pressure is lower than 10 bar. If the pressure increases e.g. by switching on the high pressure pump the freeze stop valve closes automatically. This improves the comfort of washing as there is no water coming out of the gun when taking it out of the lance holder.

easywash365+ foam sets

By introducing the universally applicable **easy**wash365+ foam sets we succeeded in enlarging the application possibility of our foam injector family.

The stainless steel injector with high pressure foam lance which is installed via a T-piece between the outlet of the high pressure unit and the original spraying unit is especially designed for the professional cleaning of trucks of shipping or food companies as well as for applications in the industrial foam cleaning.

The connection from injector unit to the high pressure foam lance is realized by an optionally high pressure hose of up to a length of 40 m. The already existing spraying unit is used for cleaning and rinsing works. Enormous savings of both cleaning agent and time can be achieved as the foam lance has cleaning agent immediately available without switching at the unit or change of equipment.

It is possible to simplify the handling of the construction and to boost efficiency at the same time by integrating two hose reels. This set is suitable for all common high pressure cleaning units for up to 310 bar and max. 90 °C.

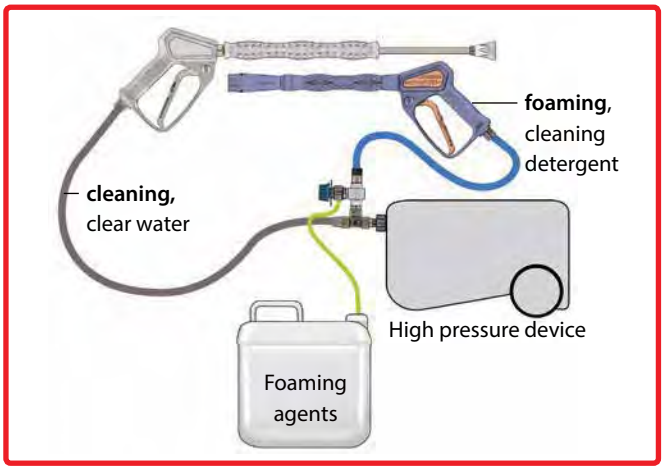

easywash365+ foam set: **easy**wash365+ foam lance standard with foam head ST-75, injector ST-160 (M22 F and 2 x M22 M) with metering valve ST-161, suction hose 1,000 mm and suction filter ST-32. Max. 310 bar / 90 °C

easywash365+ wash brushes - large areas are completely clean from now on!

By means of a very wide work surface of approx. 260 x 80 mm the easywash365+ wash brush is especially designed for the efficient cleaning of large areas such as railway carriages, tramcars, omnibuses, caravans, trucks, boats and ships, facades, greenhouses as well as vehicles, motorcycles and many more.

Fine and extremely soft natural bristles with split ends ensure an especially gentle cleaning of sensitive surfaces such as windows and car finish. The solid body of the **easy**wash365+ wash brush consists of 152 bristle bundles which are attached undetachably by means of multi-component synthetic resin.

Our **easy**wash365+ wash brush convinces all users working in the self-service foam- and prewash of an ideal and very easy handling.

The soft coating of the body made out of thermoplastic elastomer demonstrably protects sensitive surfaces from damages.

The inlet of the **easy**wash365+ wash brush is equipped with a brass insert with 1/4" female thread which is fixed in the body. By means of an additional grub screw the high pressure lances available at self-service bays are safe from twisting and theft. Therefore, the grub screw needs to be screwed to the lance tube. **Further fastening plates or protection against theft are not required.**

13 outlet ports at the bottom of the **easy**wash365+ wash brush enable the required water flow and guarantee a convincingly good foam quality at the same time.

Mosmatic flex-brush wand – no more washing without coin slot!

Flex-mechanism: The Flex-Brush has an additional feature compared to all existing wands. It's the wobble feature! This will allow the brush head to wobble when not under pressure and become solid when under pressure. The mechanism requires a minimum pressure of 2.5 bar to be used. This will happen through a pin which moves forward. As soon as the pressure drops, the pin will move back to its origin position and the brush head starts to wobble again.

Integrated swivel (optional): An integrated swivel at the inlet of the brush-wand will give you optimal freedom of movement. In addition, the high pressure hose will not tangle up and will provide the user a secure handling.
easywash365+ handle (optional): for a safe and ergonomic handling.

Lance with moulded handle, air injector and wash brush (bristles 60 mm). Max. 50 °C

Wheel scrubber WHEELBLASTER PRO

» Made out of stainless steel
» 4 nozzles tips are required
» Variable height and swing adjustment
» Multiple cleaning heads can be installed
» High impact at distance
» DYTIs swivel
» Rotor arm 160/160 mm
» **Delivery about 3 weeks**

The Wheelblaster Pro is the new standard for vehicle wash systems. The complete wash head can be placed nearly anywhere you wish and has variable height and swing adjustment. The unit must be equipped with 4 stabilizer nozzles. These four 0° stabilizer nozzles increase distance and impact to achieve optimal cleaning. It is possible to cover a larger cleaning area by mounting various cleaning heads on the 1 meter high stand

CARWASH COMFORT - the new hose wonder in self-service washing bays

- » High standard of easy and comfortable use in combination with spraying equipment, e.g. brush lance.
- » Light weight, 92 g/m at DN 6. More than half in weight in comparison to an usual self-service hose.
- » Chemically resistant, smooth interior made out of PES.
- » Transparent surface made out of a thermoplastic elastomer, depending on colour: CCBL, CCRT, CCGR, CCGE, CCGN.
- » Oil-, UV-, ozone-resistant and weatherproof.
- » Flexible in case of low temperatures: -40 °C – +60 °C, -40 °F – +140 °F.
- » High-tensile polyester reinforcing, working pressure of up to 200 bar, with a fourfold guarantee, that the hose does not burst.
- » Outer diameter 12 mm at DN 6.
- » Burst pressure > 800 bar.

Sprayer

Industry Line

The sprayer of the series Industry line are special devices for extraordinary difficult applications such as car wash, oil platforms or industrial cleaning applications.
They are resistant to lots of chemicals which are used in industry.
Due to the acid-resistant lance, the EPDM / Viton seals and the extremely durable high-pressure container the devices are designed for the most difficult cleaning applications. Safety for the user is absolutely guaranteed.

Field of application
» Oil industry
» Chemical industry
» Control of epidemics
» Workshops and factories
» Disinfection and rat control

Ergo Industry

The compression sprayer of the series Industry line are modern hand pressure sprayer. Due to their user-friendly design and the excellent quality of their Viton seals they are the best on the market regarding technical solutions of compression sprayer.

Equipment
» Nozzle consisting of a regulator for defining the stream angle
» Interior filter being placed at the **flexible** intake pipe. **Upside down spraying is possible**
» Durably efficient pump
» Precision dosing valve. **With transparent volume scale on the tank**
» Ergonomic shape. **On-off button for spraying at the handle**
» The sprayer can be hung up by means of the hand grip

R+M Nr.			VPE

106 995 020 2	2.0 l	0.60 kg	1/12

Mini Line

The trigger sprayer of the series Mini line are used for manual spraying and sprinkling of plants in greenhouses, gardens, on terraces and balconies. The sprayer are equipped with technically advanced nozzles with adjustable stream angle. They are perfect devices for spraying liquid fertilizers, chemicals and for sprinkling water. All parts of the sprayer are made out of durable materials which are resistant to chemicals. The special spraying head of the Mini assures a very fine stream of liquid so that it does not weep. sealing: NBR

Equipment
» Precision valve for an ideal spraying of liquids
» Ergonomic spraying head is fitted with an easy pusher for spraying
» Filter armed at the little intake pipe

Sprayer

titan

Titan is a modern and comfortable knapsack sprayer viton seals.
Titan knapsack is designed to make their exploitation and operation easy and comfortable. The lever can be adapted to either side of the sprayer to suit both right and left hand operators.

Equipment:

» telescopic wand 75-135 cm
» light-weight, hermetic (no-hole at the base) tank
» transparent walls with a scale
» strong, durable base
» high efficient pump with glass balls inside the piston
» 2 nozzles with regulation of stream angle MR1.5 (1.5 mm), MR1.0 (1.0 mm)
» push-in valve (thumb control for instant on/off)
» safety valve
» in line filter
» reinforced PCV hose 130 cm
» extra spare parts and silicone smear enclosed

AXEL

After being filled (up to 2/3 l) and short pumping (up to 4 bar), the AXEL foam sprayer is immediately ready for use. Three more foam nozzles are included in the scope of supply. Depending on the foam carpet to be generated, they can be changed quickly. This is why this sprayer is unique in terms of its various fields of use. Thanks to the EPDM seals, the sprayer is perfectly suitable for a large number of cleaning agents/shampoos. When removing the foam nozzle inserts, AXEL 2000/3000 can be used like a normal pressure sprayer, too. This is why the AXEL foam sprayers are probably the best foam sprayers of this type available in the market.

Equipment:

» incl. 3 more foam nozzles with exchangeable pads
» EPDM seal kit

Foam gun

Applications

Designed for applications with acidic and caustic cleaner, soaps, disinfectants, degreasing and softening agents. The field of application is very versatile.

» Food industry and canteen kitchen
» Sanitary facilities and swimming baths
» Cleaning of trucks, cars and other vehicles
» Garages and petrol stations
» Shops and workshops

The foam gun directly connected to the public water pipe produces a cleaning foam by means of foam injector. The water pressure sucks in the cleaning agent and air, both are being mixed to consistent foam, sprayed out via the spraying head and the foam wand. The cleaning agent can also purposely and automatically be diluted via a built-in proportioner so that the right mixture of chemical and water as foam can be chosen for the cleaning application.

Features

» Exceptional chemical resistance to acidic and caustic cleaner.
» Foam generating wand creates a thick clinging foam.
» Automatic dosing of chemicals.
» Durable polymer mixing head with stainless steel screws.
» Multi-ratio dial has 5 mixing settings and off.
» Anti-siphon built into handle.
» Gun is removable from quick coupling for clear rinsing with water.
» Easy filling by means of wide mouth.
» Only works with water pipe pressure.
» Suitable for all customary water couplings.

Technical specifications

Water pressure 2.5 - 6 bar (for maximum accuracy 3 - 4 bar)
Output 5.5 l/min

easyclean365+ Gun

New improved version

The new cleaning wonder the so called **easy**clean365+ Gun ensures the most professional and efficient interior and exterior cleaning of all kinds of dirt in the car wash sector.

From now on strenuous manual work together with different cleaning agents are not necessary anymore as the **easy**clean365+ Gun removes chocolate on seats, dirt in ventilation ducts and also brake dust on wheel rims by its technically mature technology.

Thereby, it generates the cleaning efficiency of a rotary cutter - only a permanent compressed air connection for minimum 5.5 bar and a suitable cleaning agent are required and necessary. By the needed low water volume and the effect in depth of the dirt a speedy drying of the surfaces is guaranteed!

Save your **easy**clean365+ Gun today and become acquainted with its convincing performance!

easyclean365+ microfibre cloths

Excellent water absorption and high absorption speed by polyurethane skin which treats the surfaces with care.

According to the principle "completely clean with only one wipe". Even spots like fingerprints are removed in the twinkling of an eye and the surfaces gleam in mint condition.

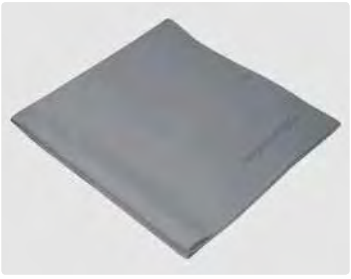

Washable and usable several times.

Water drops on the surfaces after cleaning are a thing of the past and the use of any detergents is dropped.

Due to the interwoven and strong texture the microfibre cloth is tear-resistant. Furthermore, it is lint-free, antibacterial, very kind to your skin and anti-allergic.

Composition: PET/PA microfibre, high-tech polyurethane.

Mosmatic air spinner system

The air spinner system is a novelty used in the self-service car wash. It is especially designed for outdoor vacuum cleaner and self-service drying plants. The air spinner system eliminates the use of floor hoses so that the user has more room to move.

Mosmatic self-service air dryer

To easily dry in a quick and uncomplicated way!

Substantially reduces water spots, no impairment of the paint – both in summer and winter. The strong blower and the especially moulded air nozzle guarantee a polished and spotless result. It dries the smallest gaps such as door joints, wing mirrors, radiator grills etc. and really eliminates water spots. Combined with a Mosmatic air spinner system the dryer is for sure an interesting and very profitable attraction at your wash bay.

Attention: Connection should be carried out by authorised staff only!

Mosmatic surface cleaner with air recovery system and integrated gum remover

» Such as the other devices of the FL-AH series the new FL-AH-KAU is a record performance regarding quality, finish and excellent cleaning result. We do not know anybody who has not yet seen places such as railway stations, stadiums, schools and many more which are covered with hundreds of chewing gums. This development is the best solution against this appearance!

» In order to ensure an effective removal of the gums the special nozzle is positioned behind the stainless steel cap. The surface is cleaned in a conventional way by means of the gun which is mounted at the right side. In case of removing stubborn dirt e.g. chewing gums the special nozzle is switched on by the gun mounted at the left side. The gums are cut up and totally removed by the hp jets and finally sucked in.

» By means of four 100 mm plastic rolls the surface cleaner can be easily moved.

» The frame as well as all mounting parts made out of stainless steel offer additional stability. Best cleaning results are achieved due to the height adjustable housing.

» The swivel has reinforced self-lubricating stainless steel ball bearings and a dual spring based carbide seal system especially designed for higher revs. This combination guarantees a very long durability.

» 2 spray guns ST-2605 equipped with the patented LTF technology, 2 hp nozzles 15° 03 and a special nozzle for the removal of chewing gums are included. Further nozzle sizes are available on request.

» Suitable for 50 mm suction hose. Suction hose is excluded.

» Max. 350 bar / 120 °C. Min. 15 l/min / 250 bar

easywash365+ vertical boom

Absolutely new in the car wash industry!

» Completely made out of stainless steel
» Rotatable by 360°
» Solid construction
» Spring action

The vertical boom for single washing bays! This cost-efficient solution is ideal for smaller self-service motorcycle, bicycle or car washing bays. It is not absolutely imperative that the boom is incorporated in the technical board as it can be easily mounted on the wall. Therefore, the vertical boom is also the perfect solution for areas with a shortage of space. Due to its compact design not much room is needed, but however a high degree of mobility is given. The radius of 360° as well as the built- in spring guarantee best possible mobility when carrying out the washing.

The **easy**wash365+ vertical boom is completely made out of stainless steel. A mounting bracket is included in the consignment.

Technical specifications:

Height 2,008 mm.
Weight 4.4 kg

R+M Nr.
108 607 01

easywash365+ suction swivel arm

New for self-service vacuum cleaning

» entirely made out of stainless steel
» solid construction
» suspension

The vertical **easy**wash365 + suction swivel arm for self-service!
This cost-effective solution is ideal for single suction places.
In this case, the arm does not necessarily have to be integrated into the cabinet technology, but can be easily mounted on a wall. Perfect if space might be limited, because due to its construction this boom needs little space and bending over offers a lot of mobility.

The built-in spring prevents kinking of the suction hose and allows a barrier-free handling with optional freedom of mobility.

The vertical **easy**wash365 + suction swivel arm is completely made out of stainless steel and is supplied including a mounting bracket.

Height 2,320 mm.
Tube height 1,500 mm.

foamblaster ST-76

The foamblaster ST-76 is designed for applications in agriculture, industry, municipal cleaning and fire fighting technology.

There are injector nozzles with diameters of up to 2.8 mm for high flow rates available for all **easy**foam365+ stainless steel injectors ST-160, ST-164, ST-166 and ST-167.

Material: stainless steel / plastic.

Min. 70 bar for use in combination with an **easy**foam365+ injector unit. Min. 30 bar for use with water / foamagent premix.

Max. 250 bar / 20 - 60 l/min / 100 °C

Max. 280 bar / 130 l/min / 100 °C

R+M Nr.		
200 078 500	nozzle protector without nozzle	1/4" M

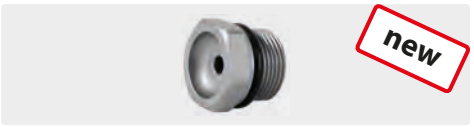

The longcast lance can be connected to a low pressure pump, to a high pressure pump, to the public water system or to the extinguishing water network.

The lance works in the medium pressure range. By means of its very good solidity, good handling and compactness the lance is especially suitable for the intensive use.

The lateral hand grip makes a stepless adjustment of the water jet during the operation possible. A long casting point jet or a progressive, conical spray jet can be set.

In order to realize ideal cleaning results the nozzle size needs to be adapted to the pump performance (pressure and water quantity).

foamblaster ST-76

The foamblaster ST-76 is designed for applications in agriculture, industry, municipal cleaning and fire fighting technology.

There are injector nozzles with diameters of up to 2.8 mm for high flow rates available for all **easy**foam365+ stainless steel injectors ST-160, ST-164, ST-166 and ST-167.

Material: stainless steel / plastic.

Min. 70 bar for use in combination with an **easy**foam365+ injector unit. Min. 30 bar for use with water / foamagent premix.

Max. 250 bar / 20 - 60 l/min / 100 °C

108 810 53	500 mm	5.3 kg

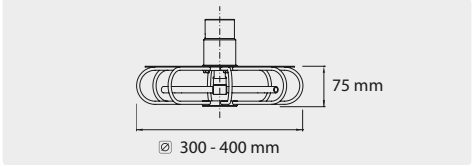

Mosmatic manhole cleaner TXS-2f with protective plate

Cleans ducts and manholes and realizes cleaning results like never before. The cleaner is self-rotating and very easy in its handling. By means of a protective plate the manhole cleaner and the user profit from extra protection.

Completely made of stainless steel.

Nozzles are excluded. 2 nozzles 1/8" M are required.

Further versions are available on request.

Mosmatic duct cleaner

Cleans ducts, tanks and every kind of container and realizes results like never before. Even the strongest dirt will be removed.

Depending on the kind of application you can either choose the fixed version having fixed horizontal rotor arms or the adjustable version. The angle of the rotor arms at the adjustable model can be changed thus varying the cleaning power.

The duct cleaner is equipped with a standard stainless steel cage protecting and prolonging the life of the rotor arm inside.

The field of application is almost unlimited. Mobile lavatories, drains, chimneys, rubbish chutes, ducts, tanks, container etc.

Further versions are available on request.

TYR 2s

TYR-2s adjustable. Duct cleaner with adjustable rotor arms for a variable spraying angle. Completely rust-free. Inlet 3/8" F. Nozzles are excluded.

weeddevil ® – Our new device for weed control

» Ideal for professional service provider in the garden-, municipal and building cleaning industry
» Completely made out of stainless steel
» **For hot water use of up to 120 °C, 0 - 350 bar**
» Suitable for low and high pressure applications
» A working width of 400 mm
» 1/4" nozzles have the ideal spraying angle of 65°
» swivelling application on sloping and vertical areas is possible

Completely chemical-free!

weeddevil®

Our spray gun ST-2605 with the patented LTF technology is recommended for effortless working.

4 nozzles 1/4" M NPT are required

At the underside: concentrated and well-directed hot water without any temperature loss by an optimally designed housing having a perfect application distance.

Useable at the left or right: the handle at the side optimises the handling and protects within hot water applications.

4 nozzles 1/4" M are required. 2 robustly industrial castors (260 mm). Max. 120 °C

Vacuum hoses oil-resistant

Hose profile-coiled made out of polyester-elastomer.
Features: An internally smooth profile hose made out of full plastic having a very low flow resistance and a good reset force (after pressing it together or bending it over) with excellent flexibility, high resistance to oil and fuel.
Range of applications: industrial vacuum cleaner, chemical plant engineering, conveyor and extraction systems, car exhaust systems, hot air.
Temperature range: - 60 °C - + 120 °C (temporary up to + 150 °C)

Suction swivel arm

easywash365+

New for self-service vacuum cleaning

» entirely made out of stainless steel
» solid construction
» suspension

The vertical **easy**wash365 + suction swivel arm for self-service!
This cost-effective solution is ideal for single suction places.
In this case, the arm does not necessarily have to be integrated into the cabinet technology, but can be easily mounted on a wall. Perfect if space might be limited, because due to its construction this boom needs little space and bending over offers a lot of mobility.

The built-in spring prevents kinking of the suction hose and allows a barrier-free handling with optional freedom of mobility.

The vertical **easy**wash365 + suction swivel arm is completely made out of stainless steel and is supplied including a mounting bracket.

Height 2,320 mm.
Tube height 1,500 mm.
Internal tube diameter of 65 mm.
Weight 10.1 kg

R+M Nr.

Car Wash vacuum hoses

The Car Wash vacuum hoses are equipped with a highly abrasion- and dirt-resistant plastic coil (non marking).

» Extremly light and very flexible structure
» An even interior for small pressure drops
» High elastic recovery in case of radial deformation
» UV-resistant, weatherproof and flexible at low temperatures

Safety spectacles, safety goggles and face shields

The accident prevention regulations of the Employer's Liability Insurance Association regarding "the use of high pressure cleaner" (BGV D15) and "tasks with liquid jets" (BGV D26) prescribe that adequate eye and face protection have to be worn in case of an operating pressure of 25 bar and more.

Safety spectacles

» Anti-fog, scratch-proof and antistatic polycarbonate lens
» Integrated side protection. Including neck cord
» 100 % UV-protection
» Protected against shock, splinters and solid particle
» Weight 25 g

R+M Nr.
956 002 817

Flip-up face shields

» Anti-fog, scratch-proof and antistatic polycarbonate lens
» Adjustable headgear
» 100 % UV-protection
» Protected against shock, splinters, solid particle and chemical danger (dangerous drops)
» Weight 200 g

R+M Nr.
956 003 487

Safety goggles with temples

» Anti-fog, scratch-proof and antistatic polycarbonate lens
» Straight temples with adjustable strap. Integrated side protection. Exchangeable plastic foam rim with indirect ventilation
» Including microfibre cloth
» 100 % UV-protection
» Shockproof in case of extreme temperatures
» Protected against shock, splinters, solid particle and liquids
» Weight 52 g

R+M Nr.
956 004 828

Safety goggles with adjustable strap

» Anti-fog, scratch-proof and antistatic polycarbonate lens
» Fits over prescription spectacles. Ball-pivot. Fits with respiratory half mask
» 100 % UV-protection
» Shockproof in case of extreme temperatures. Resistant to chemical drops, toxic gases, small and big toxic particle, melting metals and hot solids
» Weight 113 g

R+M Nr.
956 003 067

Visor

» Anti-fog, scratch-proof and antistatic polycarbonate lens
» Visor in connection with safety goggle 956 003 067
» Shockproof in case of extreme temperatures. Resistant to chemical drops, toxic gases, small and big toxic particle, melting metals and hot solids
» Weight 73 g

R+M Nr.
956 003 128

easyprotect365+ protection for high pressure cleaning

easyprotect365+ **professional protective clothing for abrasive blasting operations up to 500 bar / 7,500 psi.**

The strongest fiber in the world for the toughest demands of the world. Thanks Dyneema any application grown to safely master the most difficult tasks.

The perfect protection for people who work professionally with high-pressure cleaner not only in the industry.

Comfort, function and safety

Until now there has been no adequate protection for high pressure cleaning.

Nothing that corresponded to the achievements of modern devices or user requirements on comfort and functionality. Our experience with water blasting work at high pressures (up to 500 bar / 7,500 psi) and other personal protective equipment are the basis for our new clothing range. **easy**protect365+ protection for high pressure cleaning.

Ideal protection for abrasive blasting of concrete rehabilitation works, shipyards, petrochemical and steel industry.

Overall with hood

» 3-layer overall with CE certification
» Security for blasting work up to 500 bar
» Adjustable cuffs, ventilation under the arms
» Lined for maximum wearing comfort
» Waterproof and breathable
» Weight 2.5 kg. Sizes XS - 3XL
» Protection class 5/5/2

R+M high quality spare parts are obtained from well-established manufacturers. As a rule they are not original spare parts. The original order numbers and the indication of other information are exclusively for your guidance and furthermore they are not intended for the general use, e.g. invoices addressed to end users. In case of mentioning the original order numbers in your orders it can not be assumed that the products ordered are original spare parts. Original spare parts are supplied when they are especially offered as those in our catalogue or in other mailing pieces such as special offers or newsletters.

R+M high quality spare parts are obtained from well-established manufacturers. As a rule they are not original spare parts. The original order numbers and the indication of other information are exclusively for your guidance and furthermore they are not intended for the general use, e.g. invoices addressed to end users. In case of mentioning the original order numbers in your orders it can not be assumed that the products ordered are original spare parts. Original spare parts are supplied when they are especially offered as those in our catalogue or in other mailing pieces such as special offers or newsletters.

R+M high quality spare parts are obtained from well-established manufacturers. As a rule they are not original spare parts. The original order numbers and the indication of other information are exclusively for your guidance and furthermore they are not intended for the general use, e.g. invoices addressed to end users. In case of mentioning the original order numbers in your orders it can not be assumed that the products ordered are original spare parts. Original spare parts are supplied when they are especially offered as those in our catalogue or in other mailing pieces such as special offers or newsletters.

R+M high quality spare parts are obtained from well-established manufacturers. As a rule they are not original spare parts. The original order numbers and the indication of other information are exclusively for your guidance and furthermore they are not intended for the general use, e.g. invoices addressed to end users. In case of mentioning the original order numbers in your orders it can not be assumed that the products ordered are original spare parts. Original spare parts are supplied when they are especially offered as those in our catalogue or in other mailing pieces such as special offers or newsletters.

Heated high pressure hoses (before 2005)	406
Heated low pressure hoses	405, 406
High pressure ball valves	368
High pressure ceiling boom including high pressure hose for walls and ceiling	426
High pressure check valves ST-264	67
High Pressure Filter ST-33	67
High pressure gauges glycerine filled	76
High pressure hose for **easy**wash365+ boom extension	425
High pressure hose reels	380, 382, 383
High pressure hoses	150
High pressure hoses for hose reels	140
High pressure hoses for self-service washing bays	143, 404
High pressure hoses for special applications	147, 148, 149
High pressure hoses per metre	156, 157
High pressure hoses per metre 1 SN	151
High pressure hoses per metre 1 ST	154
High pressure hoses per metre 2 SC	153
High pressure hoses per metre 2 SC / 2 SN	152
High pressure hoses per metre 2 ST	154
High pressure hoses with smooth cover	127, 129, 131, 132, 135-138
High pressure hoses with smooth cover - 500 bar	129, 170
High pressure hoses with wrapped cover	126, 128, 130, 134, 136, 137
High pressure hoses with wrapped cover and smooth cover	133
High pressure nozzles	70, 264, 265, 310
High pressure nozzles BSP	310
High pressure nozzles NPT	292
High pressure pipes	365
High pressure quick couplings	117, 118
High pressure quick couplings ST-246, Suttner	121
High pressure quick couplings ST-3100, Suttner	120, 309, 448
High pressure quick couplings ST-45-250 KW, Suttner	119
High pressure solenoid valves closed in off-position	76, 77, 369
High pressure spray guns	218
High pressure spray guns for self-service car wash	387, 388
High pressure spray guns for self-service car wash, Suttner	215
High pressure spray guns, Suttner	188-200, 211, 216, 452
High pressure telescopic lances	257, 290
High RPM swivels DY-Series / WDRS Mosmatic	116, 435
High RPM swivels DY-Series Mosmatic	116, 434
High-low wash brush	36, 438
Hobby high pressure hoses	139
Holder for motorcycle helmets	400
Hollow	89
Hollow (1 gal = 3.785 litres)	89
Hose adaptor	123
Hose assemblies	147
Hose bend restrictor	158
Hose bend restrictor - elastomer	158
Hose bend restrictor - elastomer, short	158
Hose bend restrictor - plastic	158
Hose bend restrictor - plastic / spiral	158
Hose carrier	427
Hose clamps	23
Hose connectors	13, 22, 122, 354, 465
Hose coupling antistatic	468
Hose couplings "universal"	13
Hose couplings "universal" - premium quality	13
Hose end clamps	371
Hose fittings pre-assembled	165
Hose flexy	218
Hose guide system . stainless steel V2A / AISI 304 . 30 mm profile	371
Hose guide system . zinc-plated steel . 30 mm profile	370, 371
Hose guides	374
Hose holder	166
Hose holder aluminium	23, 166
Hose holders	23
Hose press	166
Hose protection	158
Hose reel trolleys	428
Hose scissors	21
Hose stops	374
Hose tails	22
Hose trolleys	371
Hose with double wire braid - DIN standard	165
Hose with single wire braid - SAE 100	165
Hose with single wire braid and smooth cover	140
Hoses from ceiling boom to foam lance	405
Hoses from ceiling boom to foam lance 1 SN DN 8 black	405
Hoses with double wire braid and smooth cover	127, 129, 131-133, 135, 136, 137, 138, 170
Hoses with double wire braid and wrapped cover	126, 128, 130, 133, 134, 136, 137, 146
Hoses with double wire braid made out of zinc-plated steel and wrapped cover	146
Hoses with single wire braid and smooth cover	127, 129, 131-133, 135, 139, 140, 168-170
Hoses with single wire braid and wrapped cover	126, 128, 130, 133, 134-137, 140, 150, 321, 396
Hoses with single wire braid and wrapped thick cover	126, 128, 130, 133, 134
